RES-E support schemes

Summary of RES-E support schemes

Overview	In Denmark, electricity from renewable sources is promoted through a premium tariff and net-metering. In addition, local initiatives for the construction of wind energy plants are supported through loan guarantees.
Summary of support system	<ul style="list-style-type: none"> • Premium tariff. In Denmark, the generation of electricity from renewable sources is promoted through a premium tariff system based on bonus payments. The operators of renewable energy plants usually receive a variable bonus, which is paid on top of the market price. The sum of the market price and the bonus shall not exceed a statutory maximum per kWh, which depends on the source of energy used and the date of connection of a given plant. • Net-Metering. Electricity producers using all or part of the electricity produced for their own needs are totally or partly exempt from paying Public Service Obligation on this electricity. The Public Service Obligation is a charge levied to support renewable energy. • Loan guarantees. Associations of wind energy plant owners and other local initiatives may apply for guarantees for loans for feasibility studies that are conducted in the run-up to the construction of a wind-energy plant.
Technologies	VE-Lov governs the promotion of technologies for the generation of electricity from wind energy, biogas, biomass, solar energy, wave and tidal energy as well as hydro-electric power stations whose capacity does not exceed 10 MW.
Statutory provisions	<ul style="list-style-type: none"> • VE-Lov (Lov om fremme af vedvarende energi No. 1392/2008 – Law on the Promotion of Renewable Energy) • Act on Electricity Supply (Bekendtgørelse af lov om elforsyning No. 1115/2006 – general provisions on the supply of electricity) • BEK 804/2010 (Bekendtgørelse om nettoafregning for egenproducenter af elektricitet – Regulation on Net-Metering)

Support schemes

Loan (Loan guarantees for local initiatives for the construction of wind-energy plants)

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> • VE-Lov • Act on Electricity Supply 	
Summary	<p>Energinet.dk provides guarantees for loans taken out by local associations of wind plant owners and other local initiative groups to finance feasibility studies prior to the construction of wind-energy plants (§ 21 VE-Lov).</p> <p>If a given wind energy project is not completed, the guarantee paid out need not be repaid unless the project was fully or partly transferred to a third party (§ 21 par. 4 VE-Lov).</p>	
Eligible technologies	General information	Loan guarantees as stipulated by VE-Lov are provided for wind energy plants only (§ 21 VE-Lov).
	Wind energy	<p>Eligible. The following plants are ineligible:</p> <ul style="list-style-type: none"> • wind energy plants with a capacity of less than 25 kW that are connected to an energy-consuming device • off-shore wind energy plants authorised under a tendering procedure (§ 21 VE-Lov). This procedure is used to grant an exclusive right to construct off-shore wind power plants in a specific area.
	Solar energy	
	Geothermal energy	
	Biogas	
	Hydro-power	

RES-LEGAL EUROPE – National Profile Denmark

	Biomass	
Amount	Energinet.dk has provided a budget of 10 million DKK (approx. € 1.3 M) for guarantees. Each guarantee will cover most of the loan in question. The maximum guarantee is 500,000 DKK (approx. € 67,209) per project (§ 21 par. 5 VE-Lov).	
Addressees	Guarantees are provided for local associations of plant owners and other local initiatives that intend to construct one or more wind energy plants. Such organisations and groups must have 10 members at least. The majority of the members shall be residents in the municipality in which the plants will be constructed or shall live within 4.5 kilometres of the building site (§ 21 par. 2 no. 1 and 2 VE-Lov). In case of off-shore wind turbines, the municipality shall be the municipality whose coastline is closest to the turbine.	
Procedure	Process flow	<ul style="list-style-type: none"> • Application. Local organisations or initiative groups apply to Energinet.dk (§ 21 par. 5 VE-Lov). • Selection procedure. Energinet.dk decides whether a guarantee will be provided (§ 21 par. 5 VE-Lov). Applicants shall meet the preconditions specified by law (§ 21 par. 2 VE-Lov). • Loan borrowing. The organisation or initiative takes out a loan from a bank. • Guarantee. Energinet.dk declares to provide a guarantee to the bank. • According to Energinet.dk, the contract between Energinet.dk and the group is an application form signed by both parties. • Period of guarantee. The guarantee is provided until the wind turbine in question is connected to the grid and ends three months after the installation of the wings at the latest (§ 21 par. 3 VE-Lov).
	Competent authority	The transmission grid operator Energinet.dk is in charge of the guarantee system (§ 21 par. 1 VE-Lov).

Flexibility mechanism		
Distribution of costs	State	
	Consumers	The costs of the support system are borne by the consumers (§ 8 par. 2 Electricity Supply Act).
	Plant operator	
	Grid operator	
	European Union	
	Distribution mechanism	<ul style="list-style-type: none"> • Consumers – grid operators. Every consumer is obliged to pay a surcharge, the so-called Public Service Obligation. It depends on each consumer's individual level of consumption. The surcharges are determined by Energinet.dk four times a year. According to Energinet.dk, the surcharges are collected by the grid operators. • Grid operators – Energinet.dk. According to Energinet.dk, the grid operators submit the surcharges collected to Energinet.dk. A certain part of this money is designated for the guarantees.

RES-LEGAL EUROPE – National Profile Denmark

Premium tariff (Law on the Promotion of Renewable Energy)

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> • VE-Lov • Act on Electricity Supply 	
Summary	Denmark promotes renewable electricity generation through a premium tariff. Plant operators receive a variable bonus on top of the market price. The sum of the bonus and the market price shall not exceed a certain statutory maximum, which depends on the date of connection of a given plant and the source of energy used (§§ 36-48 VE-Lov). In certain cases, plant operators are granted a guaranteed bonus on top of the market price. In such cases the maximum is not defined by law.	
Eligible technologies	General information	The Law on the Promotion of Renewable Energy promotes all technologies except for geothermal power generation (§ 2 VE-Lov).
	Wind energy	Both on-shore and off-shore plants are eligible (§§ 36-43 VE-Lov).
	Solar energy	Eligible (§§ 47, 48 VE-Lov). According to the energy agency, only installations with a capacity of at least 6 kW are eligible for the premium tariff.
	Geothermal energy	
	Biogas	Eligible (§ 44 VE-Lov).
	Hydro-power	Eligible under the following conditions (§§ 47, 48 VE-Lov): <ul style="list-style-type: none"> • Conventional hydro-electric power plants. Eligible up to a capacity of 10 MW (§ 50 par. 6 VE-Lov). • Wave power plants. Eligible without restriction (§§ 47 par. 1 no. 1 VE-Lov).

RES-LEGAL EUROPE – National Profile Denmark

	Biomass	Eligible (§§ 45-46 VE-Lov).
Amount	General information	<p>There are two types of bonuses:</p> <ul style="list-style-type: none"> • Maximum bonus: The bonus varies according to the market price and the statutory maximum set for the sum of both the market price and the bonus. • Guaranteed bonus: In certain cases, plant operators are granted a guaranteed bonus on top of the market price. In such cases the maximum is not defined by law (§§ 36-48 VE-Lov). <p>The following bonuses apply to new plants coming on line:</p>
	Wind energy	<ul style="list-style-type: none"> • On-shore plants: <ul style="list-style-type: none"> ○ Guaranteed bonus of 0.25 DKK (approx. €ct 3) per kWh for 22,000 full load hours (§ 36 VE-Lov) ○ Plants financed by utility companies: maximum subsidy (bonus plus market price) of 0.33 DKK (approx. €ct 4) per kWh, applicable for 10 years from the date of connection of the plant, plus guaranteed bonus (unlimited term) of 0.10 DKK (approx. €ct 1) per kWh (§ 40 VE-Lov) • Off-shore plants: <ul style="list-style-type: none"> ○ Wind farms: maximum subsidy (bonus plus market price) depends on the location of the farm: <ul style="list-style-type: none"> ▪ 0.518 DKK (approx. €ct 7) per kWh for electricity produced at the off-shore wind farm Horns Rev 2 for a total of 10 TWh, limited to 20 years from the date of connection of the wind farm (§ 37 par. 2 no. 1 VE-Lov). ▪ 0.629 DKK (approx. €ct 8) per kWh for electricity produced at the off-shore wind

		<p>farm Rødsand 2 for a total of 10 TWh, limited to 20 years from the date of connection of the wind farm (§ 37 par. 2 no. 2 VE-Lov).</p> <ul style="list-style-type: none"> ▪ 1.051 DKK (approx. €ct 14) per kWh for electricity produced at the off-shore wind farm Anholt for a total of 20 TWh, limited to 20 years from the date of connection of the wind farm (§ 37 par. 2 no. 3 VE-Lov). The bonus will not be paid during hours in which the market price (i.e. the Nordpool spot price) is not positive. This can occur when the demand for electricity is lower than the offer (§ 37 par. 5 VE-Lov). ○ Plants financed by utility companies: maximum subsidy (bonus plus market price) of 0.353 DKK (approx. €ct 5) per kWh, applicable to 42,000 full load hours, plus guaranteed bonus (unlimited term) of 0.10 DKK (approx. €ct 1) per kWh (§ 40 VE-Lov) • Plants with an installed capacity of up to 25 kW that generate electricity for the operator's own use: maximum subsidy (bonus plus market price) of 0.60 DKK (approx. €ct 8) per kWh (§ 41 VE-Lov)
	Solar energy	<ul style="list-style-type: none"> • Maximum subsidy (bonus plus market price) for installations deemed to be of strategic importance by the competent ministry: 0.60 DKK (approx. €ct 8) per kWh, applicable in the first 10 years of operation, and 0.40 DKK (approx. €ct 5) per kWh for a further 10 years (§ 47 par. 3 no. 1 VE-Lov). • Hybrid installations: for the proportion of electricity generated by a strategically important technology: guaranteed bonus of 0.26 DKK (approx. €ct 3) per kWh, applicable for the first 10 years of operation, and 0.06 DKK

RES-LEGAL EUROPE – National Profile Denmark

		(approx. €ct 0.8) per kWh, applicable for a further 10 years (§ 48 par. 3 no. 1 VE-Lov).
	Geothermal energy	
	Biogas	<ul style="list-style-type: none"> • Maximum subsidy (bonus plus market price): 0.745 DKK (approx. €ct 10) per kWh (§ 44 par. 2 VE-Lov). • Co-firing: for the proportion of electricity generated from the combustion of biogas: guaranteed bonus of 0.405 DKK (approx. €ct 5) per kWh (§ 44 par. 3 VE-Lov). • The tariff is net-price indexed. It is calculated every year on 1 January and based on 60% of the increase in the net price index of the previous year as compared to 2007 (§ 44 par. 4 VE-Lov).
	Hydro-power	<ul style="list-style-type: none"> • Guaranteed bonus of 0.10 DKK (approx. €ct 1) per kWh, applicable for 20 years from the date of connection of the plant (§ 47 par. 3 no. 2 VE-Lov). • Plants deemed to be of strategic importance by the ministry in charge (currently, only wave energy comes under this definition): maximum subsidy (bonus plus market price) of 0.60 DKK (approx. €ct 8) per kWh, applicable for the first 10 years of operation and 0.40 DKK (approx. €ct 5) per kWh for a further 10 years (§ 47 par. 3 no. 1 VE-Lov). • Hybrid plants: <ul style="list-style-type: none"> ○ for the proportion of electricity generated from hydro-energy, guaranteed bonus of 0.10 DKK (approx. €ct 1) per kWh, applicable for 20 years from the date of connection of the plant (§ 48 par. 3 no. 2 VE-Lov). ○ for the proportion of electricity generated by a strategically important technology: guaranteed bonus of 0.26 DKK (approx. €ct 3) per kWh,

RES-LEGAL EUROPE – National Profile Denmark

		applicable for the first 10 years of operation, and 0.06 DKK (approx. €ct 0.8) per kWh for a further 10 years (§ 48 par. 3 no. 1 VE-Lov).
	Biomass	<ul style="list-style-type: none"> Guaranteed bonus of 0.15 DKK (approx. €ct 2) per kWh (§ 45 par. 2 VE-Lov). Plants financed by utility companies: Maximum subsidy (bonus & market price) of 0.30 DKK (approx. €ct 4) per kWh plus guaranteed bonus of 0.10 DKK (approx. €ct 1) per kWh, applicable for 10 years from the date of connection of the plant, will end on 1 August 2011 at the earliest (§ 46 VE-Lov).

Net-Metering

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> BEK 804/2010 	
Summary	<p>The Regulation on Net-metering authorises the exemption of certain plant operators from paying Public Service Obligation (PSO) or part of it. Electricity producers using all or part of the electricity produced for their own needs are completely or partially exempt from paying Public Service Obligation on this electricity. The Public Service Obligation is a charge levied to support renewable energy (§ 1 BEK 804/2010).</p>	
Eligible technologies	General information	<p>All technologies except for geothermal energy are eligible for net-metering (§ 2 no. 6 BEK 804/2010).</p> <p>Plants must be connected to a collective grid, installed at the place of consumption and fully owned by the consumer (§ 3 par. 3 BEK 804/2010).</p> <p>Moreover, plants must be listed in a key data register (Stamdataregistret) (§ 6 BEK 804/2010).</p>
	Wind energy	Eligible only if the plant is connected to a private supply system (§ 3 par. 2, 4 and § 4 par. 2, 3 BEK 804/2010).
	Solar energy	Eligible (§ 3 par. 2 and § 4 par. 2 BEK 804/2010). Installations with a capacity of up to 50 kW must be connected to a supply system (§ 4 par. 3 BEK 804/2010).
	Geothermal energy	
	Biogas	Eligible. Plants with a capacity of up to 11 kW must be connected to a supply system (§ 4 par. 3 BEK 804/2010).
	Hydro-power	Eligible. Plants with a capacity of up to 11 kW must be connected to a supply system (§ 4 par. 3 BEK 804/2010).
	Biomass	Eligible. Plants with a capacity of up to 11 kW must be connected to a

RES-LEGAL EUROPE – National Profile Denmark

		supply system (§ 4 par. 3 BEK 804/2010).
Amount	<p>Every consumer is obliged to pay a surcharge, the so-called Public Service Obligation. It depends on each consumer's individual level of consumption. The surcharge for the support of renewable energy is part of the PSO tariff. The surcharges are determined by Energinet.dk four times a year.</p> <p>Which surcharge a plant owner is exempt from depends on the installed capacity of his plant.</p> <ul style="list-style-type: none"> • The following plants are exempt from the whole PSO tariff: <ul style="list-style-type: none"> • Solar energy installations up to 50 kW • Wind energy plants up to 25 kW • Other technologies up to 11 kW (§ 4 par. 2 BEK 804/2010). • The following plants are exempt from the surcharge for the support of renewable energy: <ul style="list-style-type: none"> • Solar energy installations > 50 kW • Wind energy plants > 25 kW • Other technologies > 11 kW (§ 3 par. 2 BEK 804/2010). 	
Addressees	<p>The persons entitled to total or partial exemption from PSO (tariff) are the owners of eligible plants (§ 3 par. 3 no. 2 BEK 804/2010). If the capacity of an installed plant does not exceed 6 kW per household or per 100 m² of a non-commercial building, the eligible addressee is not required to be the only owner of the installation. However, he must be a tenant in the building in which the plant has been installed and his electricity consumption must be separately metered (§ 5 par. 2 no. 3 BEK 804/2010).</p>	
Procedure	Process flow	<p>Operators of the following plants:</p> <ul style="list-style-type: none"> • Solar energy installations > 50 kW • Wind energy plants > 25 kW • Other technologies > 11 kW <p>must apply to Energinet.dk for net-metering, which is calculated on an hourly basis (§ 3 par. 1 BEK 804/2010).</p> <p>Operators of the following plants:</p> <ul style="list-style-type: none"> • Solar energy installations up to 50 kW • Wind energy plants up to 25 kW

RES-LEGAL EUROPE – National Profile Denmark

		<ul style="list-style-type: none"> Other technologies up to 11 kW <p>are automatically registered for net-metering. The operators of these plants may apply for net-metering to be calculated on an hourly basis (§ 4 BEK 804/2010).</p> <p>Operators of plants with a capacity of 6 kW or less per household or per 100 m² of a non-commercial building must apply to Energinet.dk for net-metering, which is calculated on a yearly basis (§ 5 BEK 804/2010).</p> <p>Energinet.dk determines whether the conditions for net-metering are met and which type of net-metering will apply (§ 7 par. 1 BEK 804/2010).</p>
	Competent authority	Energinet.dk (§ 7 par. 1 BEK 804/2010).

RES-E grid issues

Overview

Overview of grid issues	In Denmark, access of electricity from renewable energy sources to the grid is mainly governed by the general legislation on energy and shall be granted according to the principle of non-discrimination. Electricity from renewable sources is subject to special provisions only with regard to the use of the grid, in which renewable energy shall be given priority. The grid users are not entitled to the expansion of the grid.
Connection to the grid	In return for payment, all plant operators shall be granted connection to the grid without certain plant operators being discriminated against (§ 24 Act on Electricity Supply). Renewable energy plants are not given priority.
Use of the grid	The operators of renewable energy plants are entitled by law to priority use of the grids against the grid operator.
Grid development	The grid operator is statutorily obliged to expand the grid in order to guarantee the efficient transmission of electricity. Whenever possible, the national target of increasing the competitiveness and use of renewable energy sources shall be given special attention. The plant operators are not entitled to the expansion of the grid.
Statutory provisions	<ul style="list-style-type: none"> • Act on Electricity Supply (Bekendtgørelse af lov om elforsyning No. 1115/2006 – general provisions on the supply of electricity) • Order 1063/2010 (Bekendtgørelse om nettilslutning af vindmøller og pristillæg for vindmølleproduceret elektricitet - Order on the Grid Connection of Wind Turbines and Support for Wind-generated Electricity)

RES-H&C grid issues

Overview

Overview of grid issues	Due to the nature of heat supply, the connection of a heat generation plant to a district heating network is closely linked to the construction of the plant. Grid connection always involves grid development, since the construction of a plant must occur simultaneously with the development of the district heating grid.
Statutory provisions	<ul style="list-style-type: none">• Act 1184/2011 (Lov om varmforsyning - The Heat Supply Act)

RES-T support schemes

Summary of support schemes

Overview	The main incentive for renewable energy use in transport is a quota system. This scheme obliges companies importing or producing petrol, gas or diesel fuels to ensure that biofuels make up a defined percentage of the company's total annual fuel sales. Furthermore, biofuels are supported through tax incentives.
Summary of support schemes	<ul style="list-style-type: none"> • Tax regulation mechanism. Companies producing, processing, possessing, receiving or dispatching energy products are obliged to pay a defined amount of tax. This amount is reduced for fuels blended with biofuels. • Biofuels quota. The main Support schemes for renewable energy sources used in transport is a quota obligation. Companies importing or producing petrol, gas or diesel fuels are obliged to ensure that biofuels make up a defined percentage of the company's total annual fuel sales.
Technologies	The tax regulation mechanism and the quota obligation apply to biofuels only.
Statutory provisions	<ul style="list-style-type: none"> • Act 674/2011 (Bekendtgørelse af lov om bæredygtige biobrændstoffer og om reduktion af drivhusgasser fra transport – Act on Sustainable Biofuels and the Reduction of Greenhouse Gas Emissions from Transport) • Act 321/2011 (Bekendtgørelse af lov om kuldioxidafgift af visse energiprodukter – Act on the Carbon Dioxide Tax on Certain Energy Products) • Act 313/2011 (Bekendtgørelse af lov om energiafgift af mineralolieprodukter m.v. – Act on the Energy Tax on Mineral Oil Products and the like)

	European Union	
	Others	
	Distribution mechanism	The obliged companies pass on the costs arising from the quota obligation to the consumers by adding a surcharge to their fuel.

Policies

Summary of policies

<p>Overview</p>	<p>The following policies aim at promoting the development, installation and use of RES installations: There are 2 training programmes for RES-installers, a certification scheme for wind energy plants, two different research, development and demonstration (RD&D) programmes and an obligation to use renewable heating in new and renovated buildings.</p>
<p>Summary of policies</p>	<ul style="list-style-type: none"> • In general, there are two types of training programmes for installers of RES plants: the Quality Assurance Scheme for the installers of solar heating plants, PV installations and biofuels, and the Heat Pump Scheme covering the installation of heat pumps. Apart from that, the vocational education for specific professions covers all the requirements of the European RES Directive. • The Danish Certification Scheme for wind energy plants comprises two kinds of certification: type certification, which certifies the general type of wind energy plant, and project certification to evaluate individual installations. • There are two types of Research, Development and Demonstration Programmes: “The Energy Technology Development and Demonstration Programme EUDP”, which supports innovative sustainable energy technologies and the “Green Labs DK Programme”, which provides subsidies for the construction of test and demonstration facilities for new sustainable technologies. • The RES-H building obligation obliges owners of new or renovated buildings with a hot water consumption of more than 2,000 litres per day to install solar heating panels.
<p>Technologies</p>

	Private Financing	In general, the trainees themselves have to bear the costs of a training course.
	European Union	
	Others	A company which wants its employees to attend a training course may apply for support from a special fund, the Electricity Skills Development Fund (Elbranchens Kompetenceudviklingsfond). The Fund was established by the TEKNIQ (Danish Mechanical and Electrical Contractors' Association) and the Danish Electricity Association (Dansk El-Forbund). Its aim is to provide funding for the training of employees. The Fund may grant 500 DKK (approx. € 67) per training day and participating employee.

RES-LEGAL EUROPE – National Profile Denmark

Certification Programmes for RES installations (Danish Certification Scheme for Wind Energy Plants)

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> Executive Order No. 651/2008
Sector	Electricity
Description	<p>The Danish certification scheme in applies to wind energy plants only. In order to be connected to the grid, wind energy plants have to meet the requirements of Executive Order No. 651 and receive a certificate of approval. The technical approval scheme is based on the requirements and procedures for the construction, production and installation of wind turbines according to IEC WT01, which is based on international standards. There are two kinds of certification:</p> <ul style="list-style-type: none"> type certification (with two classes of certification: A or B) (§ 3 par. 1 Executive Order No. 651/2008) project certification. <p>Obtaining a type certification lies in the responsibility of the plant's manufacturer or supplier. Type A certificates are issued for a maximum of five years (§ 3 par. 2 Executive Order No. 651/2008). Type B certificates are issued if some quality concerns still have to be solved, but no issues of significant importance to the safety of the plant's operation were detected. This certification shall be issued for a maximum of one year. It allows the existing quality issues to be evaluated and improved during that timeframe (§ 3 par. 3 Executive Order No. 651/2008).</p> <p>Type certification is a prerequisite for project certification (§ 3 par. 1 Executive Order No. 651/2008).</p> <p>It is the responsibility of a plant's owner to obtain project certification (§ 6 par. 3 Executive Order No. 651/2008). A given wind plant shall, at the time of installation, be examined once more in order to state if the evaluation for type A and B certification are also applicable in the given conditions of installation (§ 6 par. 1 Executive Order No. 651/2008). If a wind turbine obtains type B project certification, the certifying body shall inform the wind turbine owner about any necessary changes (§ 6 par. 2 Executive Order No. 651/2008).</p> <p>Wind turbines with a rotor area of 5 m² or less must only receive type certification and are excluded from project certification (§ 12 par. 4 Executive Order No. 651/2008).</p> <p>In addition, wind turbines must be CE marked.</p> <p>There are no national or regional technical requirements that exceed European standards.</p>
Addressees	Type certification for wind turbines shall be issued to the manufacturers or suppliers of wind energy plants (§ 3 par. 1 Executive Order No. 651/2008)

RES-LEGAL EUROPE – National Profile Denmark

	Project certification shall be issued to the owner of a specific wind energy plant (§ 6 par. 3 Executive Order No. 651/2008).	
Competent authority	<p>The certification scheme is managed by the 'Energy Agency's Secretariat for the Danish Wind Turbine Certification Scheme' at Risø National Laboratory for Sustainable Energy (Technical University of Denmark).</p> <p>The bodies responsible for assigning certificates of approval to wind energy plants must be accredited by the Danish Accreditation and Metrology Fund (Danske Akkrediterings- og Metrologifond) – DANAK (§ 16 par. 1 Executive Order No. 651/2008).</p> <p>All certifying bodies must be registered with the Danish Energy Agency's Secretariat for Wind Energy Plants (§ 16 par. 4 Executive Order No. 651/2008).</p>	
Further information	Further information is available at the Danish Energy Agency's Secretariat for Wind Energy Plants: http://www.wt-certification.dk/	
Distribution of costs	State	
	Industry	
	Plant manufacturers	The costs of type certification shall be borne by the manufacturers and suppliers of a wind energy plant (§ 20 par. 1/2008).
	European Union	
	Others	The costs of project certification shall be borne by the owner of a wind energy plant (§ 20 par. 1/2008).

RES-LEGAL EUROPE – National Profile Denmark

Exemplary role of public authorities in accordance with art. 13 par. 5 RES Directive

Abbreviated form of legal source(s)	
Sector	None (Electricity, Heating, Transport)
Description	Regarding the exemplary role of public authorities, there are numerous measures aiming at reducing energy demand. Apart from these energy efficiency measures, there is no policy aiming at the increased use of RES by public authorities.
Addressees	
Competent authority

RES-LEGAL EUROPE – National Profile Denmark

RD&D Policies (The Energy Technology Development and Demonstration Programme EUDP)

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> Act 555/2007
Sectors	Electricity, Heating, Transport
Description	<p>The programme “Energiteknologisk Udviklings- og Demonstrationsprogram” (EUDP) supports the development, demonstration and market-introduction of innovative sustainable energy technologies (§ 2 Act 555/2007). The aim of this programme is to promote the efficient use of energy and help Denmark to become independent from fossil energy by 2050.</p> <p>Funding will be allocated through a tender process. The tenders will take place 2-3 times a year. The decisions on the amount of funding to be provided and the projects to be supported are made by an independent committee appointed by the Minister of Climate, Energy and Building.</p> <p>The precondition for receiving grants is that a private investor or applicant’s partner is willing to finance more than a half of the project and to commercialise its results.</p>
Addressees	The eligible addressees are public or private companies or knowledge institutions (§ 7 Act 555/2007).
Competent authority	Danish Energy Agency
Further information	Further information is available at: http://www.ens.dk/DA-DK/NYTEKNOLOGI/OM-EUDP/Sider/Forside.aspx

RES-LEGAL EUROPE – National Profile Denmark

RD&D Policies (Green Labs DK Programme)

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> Act 555/2007
Sectors	Electricity, Heating, Transport
Description	<p>The Green Labs DK Programme grants subsidies for the construction of large-scale test and demonstration facilities for new sustainable technologies (§ 2a Act 555/2007).</p> <p>The scheme provides grants to a small number of green labs, where companies can test and demonstrate new green technologies under realistic circumstances. The programme supports green labs using all types of technology that can help Denmark become independent from fossil fuels. These are, first and foremost, energy efficiency and renewable technologies.</p> <p>The programme's budget is 210 million DKK (approx. 28 million €) for a period of two years, from 2010 to the end of 2012.</p>
Addressees	The eligible addressees are public or private companies and knowledge institutions (§ 7 Act 555/2007).
Competent authority	<p>The Green Labs DK Programme is run by an independent board appointed by the Minister of Climate, Energy and Construction (§ 3 Act 555/2007).</p> <p>The Secretariat of Green Labs DK is a part of the Danish Energy Agency and is responsible for the daily operation of the programme.</p>
Further information	Further information is available at: http://www.ens.dk/da-DK/NyTeknologi/greenlabs/Sider/greenlabs.aspx

RES-H building obligations

Abbreviated form of legal source(s)	<ul style="list-style-type: none">• Building Regulations
Sectors	Heating
Description	The 2010 Building Regulations oblige owners of new or renovated buildings with a hot water consumption of more than 2000 litre per day to install solar heating panels. These panels shall cover an energy demand equivalent to the hot water consumption under normal operating conditions. This obligation does not apply to buildings using direct heating (Building Regulations art. 8.6.2. par. 2)
Obligated entities	According to the Building Act, the owner of the building is responsible for fulfilling the obligations of the Danish building regulations.
Competent authority	The Danish Enterprise and Construction Authority
Further information	http://www.ebst.dk/bygningsreglementet.dk .
Obligation on regional level	No obligations on the regional level.

Support of RES-H infrastructure

Abbreviated form of legal source(s)	
Sectors	Heating
Description	In Denmark, support for RES-H infrastructure is provided only on the local level. The Ministry of Climate and Energy encourages local authorities to support projects that promote the use of district heating.
Addressees	
Competent authority	Ministry of Climate and Energy and District Councils
