## **Denmark – summary text**

In Denmark, electricity from renewable sources is mainly promoted through a premium tariff and net-metering. Renewable energy sources for heating purposes are exempt from the tax obligations on the production, supply and use of energy sources. The use of biogas for heating purposes is supported through a direct tariff. The main incentive for renewable energy use in transport is a quota system. Selling of biogas for transport purposes is supported through a direct tariff.

Access of electricity from renewable energy sources to the grid shall be granted according to the principle of non-discrimination. With regard to the use of the grid, renewable energy shall be given priority. The connection of a heat generation plant to a district heating network in Denmark always involves grid development, since the construction of a plant must occur simultaneously with the development of the district heating grid.

There is number of policies aiming at promoting the development, installation and use of RES installations.

## RES-E support schemes

### Summary of RES-E support schemes

<b>Overview</b>	In Denmark, electricity from renewable sources is promoted through a premium tariff and net-metering. In addition, local initiatives for the construction of wind energy plants are supported through loan guarantees. Small renewable electricity generation installations deemed to be of strategic importance in Denmark are eligible for a subsidy.
<b>Summary of support system</b>	<ul style="list-style-type: none"> <li>• <b>Premium tariff.</b> In Denmark, the generation of electricity from renewable sources is promoted through a premium tariff system based on bonus payments. The operators of renewable energy plants usually receive a variable bonus, which is paid on top of the market price. The sum of the market price and the bonus shall not exceed a statutory maximum per kWh, which depends on the source of energy used and the date of connection of a given plant.</li> <li>• <b>Net-Metering.</b> Electricity producers using all or part of the electricity produced for their own needs are totally or partly exempt from paying Public Service Obligation on this electricity. The Public Service Obligation is a charge levied to support renewable energy.</li> <li>• <b>Loan guarantees.</b> Associations of wind energy plant owners and other local initiatives may apply for guarantees for loans for feasibility studies that are conducted in the run-up to the construction of a wind-energy plant.</li> <li>• <b>Subsidy.</b> Small renewable electricity generation installations deemed to be of strategic importance in Denmark may receive a subsidy - ForskVE.</li> </ul>
<b>Technologies</b>	VE-Lov governs the promotion of technologies for the generation of electricity from wind energy, biogas, biomass, solar energy, wave and tidal energy as well as hydro-electric power stations whose capacity does not exceed 10 MW.
<b>Statutory provisions</b>	<ul style="list-style-type: none"> <li>• VE-Lov (Lov om fremme af vedvarende energi No. 1392/2008 – Law on the Promotion of Renewable Energy)</li> <li>• Act on Electricity Supply (Bekendtgørelse af lov om elforsyning No. 1115/2006 – general provisions on the supply of electricity)</li> <li>• BEK 1068/2012 (Bekendtgørelse om nettoafregning for egenproducenter af elektricitet – Regulation on Net-Metering)</li> </ul>

### Support schemes

#### Subsidy (The ForskVE-programme - Funds for small renewable energy technologies)

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>• VE-Lov</li> <li>• BEK 692/2012</li> <li>• Act on Electricity Supply</li> </ul>	
<b>Contact Authority</b>	Energinet.dk	
<b>Summary</b>	Energinet.dk provides funding to promote the deployment of small electricity generation installations using renewable energy sources or technologies deemed to be of strategic importance by the competent ministry, including PV-installations, wave power plants and special installations using biogas and biomass as electricity source (§ 49 par. 1 VE-Lov in conjunction with § 1 BEK 692/2012).	
<b>Eligible technologies</b>	<b>General information</b>	Subsidies are provided for small electricity generation installations using renewable energy sources that are deemed to be of strategic importance by the competent ministry. This includes PV-installations, wave power plants and special installations using biogas and biomass as electricity source (§ 1 BEK 692/2012). Eligible installations have to be connected to the grid (§49 par. 3 VE-Lov). Only installations which are believed to be able to produce electricity on a regular basis are eligible (§ 2 BEK 692/2012).
	<b>Wind energy</b>	
	<b>Solar energy</b>	Eligible are building integrated solar energy installations (§ 1 BEK 692/2012).

	<b>Geothermal energy</b>	
	<b>Biogas</b>	Electricity generation installations using gas produced through gasification of biomass are eligible (§ 1 BEK 692/2012).
	<b>Hydro-power</b>	Wave power plants are eligible (§ 1 BEK 692/2012).
	<b>Biomass</b>	Electricity generation installations using stirling engine and other similar facilities with biomass as an energy source are eligible (§ 1 BEK 692/2012).
<b>Amount</b>	<p>The subsidy may be rewarded for the coverage of the following costs:</p> <ul style="list-style-type: none"> <li>- investment, preparation or installation costs into the plant in order to enable the production of electricity and the costs of commissioning of the plant into a proving phase, including the cost of the necessary consultancy (§ 3 par. 1 no. 1 BEK 692/2012).</li> <li>- expenses for preparing of results concerning its finance and operations for a period after commissioning (§ 3 par. 1 no. 2 BEK 692/2012).</li> </ul> <p>Energienet.dk has provided and manages a budget, which amounts to 25 million DKK per year (approx. € 3.35 M) until the end of 2015 (§ 49 par. 2 VE-Lov).</p>	
<b>Addressees</b>	<p>Subsidies are aimed to promote market introduction of installations, including pilot projects on a smaller scale (§ 49 par. 3 VE-Lov). Applicants have to be project owners, both enterprises and institutions.</p> <p>Installations receiving support through a premium tariff are still eligible for the subsidy scheme (§ 3 par. 2 BEK 692/2012).</p>	
<b>Procedure</b>	<b>Process flow</b>	<ul style="list-style-type: none"> <li>• <b>Tender.</b> Tenders for the application for the ForskVE subsidies are published on a special website: <a href="http://www.forskel.dk">www.forskel.dk</a> (§ 10 par. 1 BEK 692/2012).</li> <li>• <b>Application.</b> An applicant has to register on this website and apply for the subsidy within a specified timeframe.</li> <li>• <b>Selection procedure.</b> Energienet.dk decides which project shall be subsidised.</li> </ul>

		<ul style="list-style-type: none"> <li>• <b>Contract.</b> The contract has to be signed between Energinet.dk and the owner of the project.</li> <li>• <b>The project is allowed to begin</b> after the contract is signed. Energinet.dk may allow a project to start before the signing of the contract.</li> <li>• <b>Interim report</b> must be drawn-up and delivered to Energinet.dk at least twice a year.</li> <li>• <b>Final report.</b> When completing the project, several documents must be submitted, including a final report, a financial statement for the entire project and an auditor's report</li> </ul>
	<b>Competent authority</b>	The transmission grid operator Energinet.dk is in charge of the subsidies (§ 49 par. 1 VE-Lov).
<b>Flexibility mechanism</b>		
<b>Distribution of costs</b>	<b>State</b>	
	<b>Consumers</b>	The costs of the support system are borne by the consumers (§ 8 par. 2 Electricity Supply Act).
	<b>Plant operator</b>	
	<b>Grid operator</b>	
	<b>European Union</b>	

	Distribution mechanism	<ul style="list-style-type: none"><li>• <b>Consumers – grid operators.</b> Every consumer is obliged to pay a surcharge, the so-called Public Service Obligation. It depends on each consumer's individual level of consumption. The surcharges are determined by Energinet.dk four times a year. According to Energinet.dk, the surcharges are collected by the grid operators.</li><li>• <b>Grid operators – Energinet.dk.</b> According to Energinet.dk, the grid operators submit the surcharges collected to Energinet.dk. A certain part of this money is designated for the guarantees.</li></ul>
--	------------------------	--

Loan (Loan guarantees for local initiatives for the construction of wind-energy plants)

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>• VE-Lov</li> <li>• Act on Electricity Supply</li> </ul>	
<b>Contact Authority</b>	Energinet.dk	
<b>Summary</b>	<p>Energinet.dk provides guarantees for loans taken out by local associations of wind plant owners and other local initiative groups to finance feasibility studies prior to the construction of wind-energy plants (§ 21 VE-Lov).</p> <p>If a given wind energy project is not completed, the guarantee paid out need not be repaid unless the project was fully or partly transferred to a third party (§ 21 par. 4 VE-Lov).</p>	
<b>Eligible technologies</b>	<b>General information</b>	Loan guarantees as stipulated by VE-Lov are provided for wind energy plants only (§ 21 VE-Lov).
	<b>Wind energy</b>	<p>Eligible. The following plants are ineligible:</p> <ul style="list-style-type: none"> <li>• wind energy plants with a capacity of less than 25 kW that are connected to an energy-consuming device</li> <li>• off-shore wind energy plants authorised under a tendering procedure (§ 21 VE-Lov). This procedure is used to grant an exclusive right to construct off-shore wind power plants in a specific area.</li> </ul>
	<b>Solar energy</b>	
	<b>Geothermal energy</b>	
	<b>Biogas</b>	
	<b>Hydro-power</b>	

## RES-LEGAL EUROPE – National Profile Denmark

	Biomass	
<b>Amount</b>	Energinet.dk has provided a budget of 10 million DKK (approx. € 1.3 M) for guarantees. Each guarantee will cover most of the loan in question. The maximum guarantee is 500,000 DKK (approx. € 67,000) per project (§ 21 par. 5 VE-Lov).	
<b>Addressees</b>	Guarantees are provided for local associations of plant owners and other local initiatives that intend to construct one or more wind energy plants. Such organisations and groups must have 10 members at least. The majority of the members shall be residents in the municipality in which the plants will be constructed or shall live within 4.5 kilometres of the building site (§ 21 par. 2 no. 1 and 2 VE-Lov). In case of off-shore wind turbines, the municipality shall be the municipality whose coastline is closest to the turbine.	
<b>Procedure</b>	<b>Process flow</b>	<ul style="list-style-type: none"> <li>• <b>Application.</b> Local organisations or initiative groups apply to Energinet.dk (§ 21 par. 5 VE-Lov).</li> <li>• <b>Selection procedure.</b> Energinet.dk decides whether a guarantee will be provided (§ 21 par. 5 VE-Lov). Applicants shall meet the preconditions specified by law (§ 21 par. 2 VE-Lov).</li> <li>• <b>Loan borrowing.</b> The organisation or initiative takes out a loan from a bank.</li> <li>• <b>Guarantee.</b> Energinet.dk declares to provide a guarantee to the bank.</li> <li>• According to Energinet.dk, <b>the contract</b> between Energinet.dk and the group is an application form signed by both parties.</li> <li>• <b>Period of guarantee.</b> The guarantee is provided until the wind turbine in question is connected to the grid and ends three months after the installation of the wings at the latest (§ 21 par. 3 VE-Lov).</li> </ul>
	<b>Competent authority</b>	The transmission grid operator Energinet.dk is in charge of the guarantee system (§ 21 par. 1 VE-Lov).

Flexibility mechanism		
Distribution of costs	State	
	Consumers	The costs of the support system are borne by the consumers (§ 8 par. 2 Electricity Supply Act).
	Plant operator	
	Grid operator	
	European Union	
	Distribution mechanism	<ul style="list-style-type: none"> <li>• <b>Consumers – grid operators.</b> Every consumer is obliged to pay a surcharge, the so-called Public Service Obligation. ### Premium tariff (Law on the Promotion of Renewable Energy)

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>• VE-Lov</li> <li>• Act on Electricity Supply</li> </ul>	
<b>Contact Authority</b>	Energinet.dk	
<b>Summary</b>	Denmark promotes renewable electricity generation through a premium tariff. Plant operators receive a variable bonus on top of the market price. The sum of the bonus and the market price shall not exceed a certain statutory maximum, which depends on the date of connection of a given plant and the source of energy used (§§ 36-48 VE-Lov). In certain cases, plant operators are granted a guaranteed bonus on top of the market price. In such cases the maximum is not defined by law.	
<b>Eligible technologies</b>	<b>General information</b>	The Law on the Promotion of Renewable Energy promotes all technologies except for geothermal power generation (§ 2 VE-Lov).
	<b>Wind energy</b>	Both on-shore and off-shore plants are eligible (§§ 36-43 VE-Lov).
	<b>Solar energy</b>	Eligible (§§ 47, 48 VE-Lov). According to the energy agency, only installations with a capacity of at least 6 kW are eligible for the premium tariff.
	<b>Geothermal energy</b>	
	<b>Biogas</b>	Eligible (§§ 43a – 43e, 44 VE-Lov).
	<b>Hydro-power</b>	Eligible under the following conditions (§§ 47, 48 VE-Lov): <ul style="list-style-type: none"> <li>• <b>Conventional hydro-electric power plants.</b> Eligible up to a capacity of 10 MW (§ 50 par. 6 VE-Lov).</li> <li>• <b>Wave power plants.</b> Eligible without restriction (§§ 47 par. 1</li> </ul>

		no. 1 VE-Lov).
	<b>Biomass</b>	Eligible (§§ 45-46 VE-Lov).
<b>Amount</b>	<b>General information</b>	<p>There are two types of bonuses:</p> <ul style="list-style-type: none"> <li>• <b>Maximum bonus:</b> The bonus varies according to the market price and the statutory maximum set for the sum of both the market price and the bonus.</li> <li>• <b>Guaranteed bonus:</b> In certain cases, plant operators are granted a guaranteed bonus on top of the market price. In such cases the maximum is not defined by law (§§ 36-48 VE-Lov).</li> </ul> <p>The following bonuses apply to new plants coming on line:</p>
	<b>Wind energy</b>	<ul style="list-style-type: none"> <li>• On-shore plants commissioned between 21.02.2008 and 31.12.2013: <ul style="list-style-type: none"> <li>○ Guaranteed bonus of 0.25 DKK (approx. €ct 3) per kWh for 22,000 full load hours plus 0,023 DKK (€ct 0,3) for covering the balancing costs (§ 36 VE-Lov)</li> <li>○ Plants financed by utility companies: maximum subsidy (bonus plus market price) of 0.33 DKK (approx. €ct 4) per kWh, applicable for 10 years from the date of connection of the plant, plus guaranteed bonus (unlimited term) of 0.10 DKK (approx. €ct 1) per kWh (§ 40 VE-Lov)</li> <li>○ Off-shore plants: Wind farms: maximum subsidy (bonus plus market price) depends on the location of the farm: <ul style="list-style-type: none"> <li>▪ 0.518 DKK (approx. €ct 7) per kWh for electricity produced at the off-shore wind farm Horns Rev 2 for a total of 10 TWh, limited to 20 years from the date of</li> </ul> </li> </ul> </li> </ul>

		<p>connection of the wind farm (§ 37 par. 2 no. 1 VE-Lov).</p> <ul style="list-style-type: none"> <li>▪ 0.629 DKK (approx. €ct 8) per kWh for electricity produced at the off-shore wind farm Rødsand 2 for a total of 10 TWh, limited to 20 years from the date of connection of the wind farm (§ 37 par. 2 no. 2 VE-Lov).</li> <li>▪ 1.051 DKK (approx. €ct 14) per kWh for electricity produced at the off-shore wind farm Anholt for a total of 20 TWh, limited to 20 years from the date of connection of the wind farm (§ 37 par. 2 no. 3 VE-Lov). The bonus will not be paid during hours in which the market price (i.e. the Nordpool spot price) is not positive. This can occur when the demand for electricity is lower than the offer (§ 37 par. 5 VE-Lov).</li> </ul> <ul style="list-style-type: none"> <li>○ Plants financed by utility companies: maximum subsidy (bonus plus market price) of 0.353 DKK (approx. €ct 5) per kWh, applicable to 42,000 full load hours, plus guaranteed bonus (unlimited term) of 0.10 DKK (approx. €ct 1) per kWh (§ 40 VE-Lov)</li> <li>○ Other off-shore plants commissioned on or after 21.02.2008: Guaranteed bonus of 0.25 DKK (approx. €ct 3) per kWh for 22,000 full load hours plus 0,023 DKK (€ct 0.3) for covering the balancing costs (§ 36 VE-Lov)</li> </ul> <ul style="list-style-type: none"> <li>• Plants with an installed capacity of up to 25 kW that generate electricity for the operator's own use: maximum subsidy (bonus plus market price) of 0.60 DKK (approx. €ct 8) per kWh (§ 41 par. 1 VE-Lov)</li> <li>• The operators of plants with an installed capacity of up to 6 kW, which were connected to the grid on 20.11.2012 or</li> </ul>
--	--	---

		<p>later, can choose between a maximum subsidy (bonus plus market price) of 0.60 DKK (approx. €ct 8) per kWh and a maximum subsidy (bonus plus market price) of 1.30 DKK (approx. €ct 17) per kWh, the latter applicable for 10 years after the grid connection. For plants connected on or after 01.01.2014 the bonus will be reduced annually by 0.14 DKK (€ct 2) until 01.01.2018 (§ 41 par. 2 in conjunction with § 47 par. 4 No. 1 VE-Lov).</p>
	Solar energy	<p>For the installations connected to the grid on or after 20.11.2012:</p> <ul style="list-style-type: none"> <li>• Installations with an installed capacity of up to 400 kW: maximum subsidy (bonus plus market price) of 1.30 DKK (approx. €ct 17) per kWh, applicable for 10 years after the grid connection. For plants connected on or after 01.01.2014 the bonus will be reduced annually by 0.14 DKK (€ct 2) until 01.01.2018 (§ 47 par. 4 No. 1 VE-Lov).</li> <li>• Common PV installations: maximum subsidy (bonus plus market price) of 1.30 DKK (approx. €ct 17) per kWh, applicable for 10 years after the grid connection. For plants connected on or after 01.01.2014 the bonus will be reduced annually by 0.17 DKK (€ct 2) until 01.01.2018 (§47 par. 4 No. 2 VE-Lov).</li> <li>• Installations with an installed capacity of more than 400 kW: maximum subsidy (bonus plus market price) of 0.60 DKK (approx. €ct 8) per kWh, applicable for the first 10 years of operation, and 0.40 DKK (approx. €ct 5) per kWh, applicable for a further 10 years (§47 par. 4 No. 4 VE-Lov).</li> <li>• Hybrid installations: for the proportion of electricity generated by a strategically important technology: guaranteed bonus of 0.26 DKK (approx. €ct 3) per kWh, applicable for the first 10 years of operation, and 0.06 DKK</li> </ul>

		(approx. €ct 0.8) per kWh, applicable for a further 10 years (§ 48 par. 3 no. 1 VE-Lov).
	<b>Geothermal energy</b>	
	<b>Biogas</b>	<ul style="list-style-type: none"> <li>Maximum subsidy (bonus plus market price): 0.793 DKK (approx. €ct 11) per kWh (§ 43a par. 2 VE-Lov). The plant operator may choose between this bonus and a guaranteed bonus of 0.431 DKK (approx. €ct 11) per kWh (§ 43a par. 4 VE-Lov). The tariff is net-price indexed. It is calculated every year on 1 January and based on 60% of the increase in the net price index of the previous year as compared to 2007 (§ 43a par. 6 VE-Lov). Additionally the operator receives a guaranteed bonus of: <ul style="list-style-type: none"> <li>0.26 DKK (approx. €ct 5) per kWh (§ 43a par. 5 VE-Lov).</li> <li>0.10 (approx. €ct 5) per kWh (§ 43a par. 5 VE-Lov).</li> </ul> </li> <li>The operators of plants with an installed capacity of up to 6 kW, which were connected to the grid on 20.11.2012 or later, can choose between maximum subsidy (bonus plus market price): 0.793 DKK (approx. €ct 11) per kWh and maximum subsidy (bonus plus market price) of 1.30 DKK (approx. €ct 17) per kWh, the latter applicable for 10 years after the grid connection. For plants connected on or after 01.01.2014 the bonus will reduce annually by 0.14 DKK (€ct 2) until 01.01.2018 (§ 43a par.7 in conjunction with § 47 par. 4 No. 1 VE-Lov).</li> <li>Co-firing: for the proportion of electricity generated from the combustion of biogas: guaranteed bonus of 0.791 DKK (approx. €ct 11) per kWh (§ 43a par. 3 and 5 VE-Lov). The tariff is net-price indexed. It is calculated every year on 1 January and based on 60% of the increase in the net price index of the previous year as compared to 2007 (§ 43a par. 6</li> </ul>

		VE-Lov).
	Hydro-power	<ul style="list-style-type: none"> <li>Guaranteed bonus of 0.10 DKK (approx. €ct 1) per kWh, applicable for 20 years from the date of connection of the plant (§ 47 par. 4 no. 5 VE-Lov).</li> <li>Plants deemed to be of strategic importance by the ministry in charge (currently, only wave energy comes under this definition): maximum subsidy (bonus plus market price) of 0.60 DKK (approx. €ct 8) per kWh, applicable for the first 10 years of operation and 0.40 DKK (approx. €ct 5) per kWh for a further 10 years (§ 47 par. 3 no. 1 VE-Lov).</li> <li>Plants deemed to be of strategic importance by the ministry in charge (currently, only wave energy comes under this definition) with an installed capacity of up to 6 kW: maximum subsidy (bonus plus market price) of 1.30 DKK (approx. €ct 17) per kWh, the latter applicable for 10 years after the grid connection. For plants connected on or after 01.01.2014 the bonus will be reduced annually by 0.14 DKK (€ct 2) until 01.01.2018 (§ 47 par. 4 No. 1 and 3 VE-Lov).</li> <li>Hybrid plants: <ul style="list-style-type: none"> <li>for the proportion of electricity generated from hydro-energy, guaranteed bonus of 0.10 DKK (approx. €ct 1) per kWh, applicable for 20 years from the date of connection of the plant (§ 48 par. 3 no. 2 VE-Lov).</li> <li>for the proportion of electricity generated by a strategically important technology: guaranteed bonus of 0.26 DKK (approx. €ct 3) per kWh, applicable for the first 10 years of operation, and 0.06 DKK (approx. €ct 0.8) per kWh for a further 10</li> </ul> </li> </ul>

		years (§ 48 par. 3 no. 1 VE-Lov).
	<b>Biomass</b>	<p>Electricity produced with usage of stirling engines and other special power generation plants with biomass as an energy source:</p> <ul style="list-style-type: none"> <li>• Maximum subsidy (bonus plus market price): 0.793 DKK (approx. €ct 11) per kWh (§ 44 par. 2 VE-Lov).</li> <li>• Co-firing: for the proportion of electricity generated from the combustion of biogas: guaranteed bonus of 0.431 DKK (approx. €ct 6) per kWh (§ 44 par. 3 VE-Lov).</li> <li>• The tariff is net-price indexed. It is calculated every year on 1 January and based on 60% of the increase in the net price index of the previous year as compared to 2007 (§ 44 par. 4 VE-Lov).</li> <li>• The operators of plants with an installed capacity of up to 6 kW, which were connected to the grid on 20.11.2012 or later, can choose between maximum subsidy (bonus plus market price): 0.793 DKK (approx. €ct 11) per kWh and maximum subsidy (bonus plus market price) of 1.30 DKK (approx. €ct 17) per kWh. For plants connected on or after 01.01.2014 the bonus will be reduced annually by 0.14 DKK (€ct 2) until 01.01.2018 (§ 44 par.5 in conjunction with § 47 par. 4 No. 1 VE-Lov).</li> </ul> <p>Electricity generated by burning biomass:</p> <ul style="list-style-type: none"> <li>• Guaranteed bonus of 0.15 DKK (approx. €ct 2) per kWh (§ 45 par. 2 VE-Lov).</li> <li>• Plants financed by utility companies: Maximum subsidy (bonus &amp; market price) of 0.30 DKK (approx. €ct 4) per kWh plus guaranteed bonus of 0.10 DKK (approx. €ct 1) per kWh, applicable for 10 years from the date of connection of the</li> </ul>

		plant, will end on 1 August 2011 at the earliest (§ 46 VE-Lov).

	Grid operator	
	European Union	
	Distribution mechanism	<ul style="list-style-type: none"> <li>• <b>Consumers – grid operators.</b> Plant operators sell their electricity to the consumers via a supply company. Every consumer is obliged to pay a surcharge, the so-called Public Service Obligation. The surcharge depends on each consumer's individual level of consumption. The surcharges are determined by Energinet.dk four times a year. According to Energinet.dk, the surcharges are collected by the grid operators.</li> <li>• <b>Grid operators – Energinet.dk.</b> According to Energinet.dk, the grid operators submit the surcharges collected to Energinet.dk.</li> <li>• <b>Energinet.dk – plant operators.</b> Energinet.dk pays the bonus to the plant operators (Energinet.dk website).</li> </ul>

### Net-Metering

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>BEK 1068/2012</li> </ul>	
<b>Contact Authority</b>	Energinet.dk	
<b>Summary</b>	<p>The Regulation on Net-metering authorises the exemption of certain plant operators from paying Public Service Obligation (PSO) or part of it. Electricity producers using all or part of the electricity produced for their own needs are completely or partially exempt from paying Public Service Obligation on this electricity. The Public Service Obligation is a charge levied to support renewable energy (§ 1 BEK 1068/2012).</p>	
<b>Eligible technologies</b>	<b>General information</b>	<p>All technologies except for geothermal energy are eligible for net-metering (§ 2 no. 6 BEK 1068/2012).</p> <p>Plants must be connected to a collective grid, installed at the place of consumption and fully owned by the consumer (§ 3 par. 3 BEK 1068/2012).</p> <p>Moreover, plants must be listed in a key data register (Stamdataregistret) (§ 5 BEK 1068/2012).</p>
	<b>Wind energy</b>	Eligible only if the plant is connected to a private supply system or if the plant is located at the place of consumption (§ 3 par. 2, 4 and § 4 par. 2, 3 BEK 1068/2012).
	<b>Solar energy</b>	Eligible only if the installation is connected to a private supply system or if the installation is located at the place of consumption (§ 3 par. 2, 4 and § 4 par. 2, 3 BEK 1068/2012).
	<b>Geothermal energy</b>	
	<b>Biogas</b>	Eligible (§ 2 no. 6 BEK 1068/2012).
	<b>Hydro-power</b>	Eligible (§ 2 no. 6 BEK 1068/2012).

	<b>Biomass</b>	Eligible (§ 2 no. 6 BEK 1068/2012).
<b>Amount</b>	<p>Every consumer is obliged to pay a surcharge, the so-called Public Service Obligation. It depends on each consumer's individual level of consumption. The surcharge for the support of renewable energy is part of the PSO tariff. The surcharges are determined by Energinet.dk four times a year.</p> <p>Which surcharge a plant owner is exempt from depends on the installed capacity of his plant.</p> <ul style="list-style-type: none"> <li>• The following plants are exempt from the whole PSO tariff: <ul style="list-style-type: none"> <li>• Solar energy installations up to 50 kW</li> <li>• Wind energy plants up to 25 kW</li> <li>• Other technologies up to 11 kW (§ 4 par. 2 BEK 1068/2012).</li> </ul> </li> <li>• The following plants are exempt from the surcharge for the support of renewable energy: <ul style="list-style-type: none"> <li>• Solar energy installations &gt; 50 kW</li> <li>• Wind energy plants &gt; 25 kW</li> <li>• Other technologies &gt; 11 kW (§ 3 par. 2 BEK 1068/2012).</li> </ul> </li> </ul>	
<b>Addressees</b>	The persons entitled to total or partial exemption from PSO (tariff) are the owners of eligible plants (§ 3 par. 3 no. 2 BEK 1068/2012).	
<b>Procedure</b>	<b>Process flow</b>	<p>Plant operators must apply to Energinet.dk for net-metering (§ 3, 4 BEK 1068/2012).</p> <p>The net-metering for the following plants:</p> <ul style="list-style-type: none"> <li>• Solar energy installations &gt; 50 kW</li> <li>• Wind energy plants &gt; 25 kW</li> <li>• Other technologies &gt; 11 kW</li> </ul> <p>is calculated on an hourly basis (§ 3 par. 1 BEK 1068/2012).</p> <p>Operators of the following plants:</p> <ul style="list-style-type: none"> <li>• Solar energy installations up to 50 kW</li> <li>• Wind energy plants up to 25 kW</li> <li>• Other technologies up to 11 kW</li> </ul>

		<p>may apply for net-metering to be calculated on an hourly basis (§ 4 BEK 1068/2012).</p> <p>Energinet.dk determines whether the conditions for net-metering are met and which type of net-metering will apply (§ 6 par. 1 BEK 1068/2012).</p>
	<b>Competent authority</b>	Energinet.dk (§ 7 par. 1 BEK 1068/2012).

## RES-E grid issues

### Overview

<b>Overview of grid issues</b>	In Denmark, access of electricity from renewable energy sources to the grid is mainly governed by the general legislation on energy and shall be granted according to the principle of non-discrimination. Electricity from renewable sources is subject to special provisions only with regard to the use of the grid, in which renewable energy shall be given priority. The grid users are not entitled to the expansion of the grid.
<b>Connection to the grid</b>	In return for payment, all plant operators shall be granted connection to the grid without certain plant operators being discriminated against (§ 24 Act on Electricity Supply). Renewable energy plants are not given priority.
<b>Use of the grid</b>	The operators of renewable energy plants are entitled by law to priority use of the grids against the grid operator.
<b>Grid development</b>	The grid operator is statutorily obliged to expand the grid in order to guarantee the efficient transmission of electricity. Whenever possible, the national target of increasing the competitiveness and use of renewable energy sources shall be given special attention. The plant operators are not entitled to the expansion of the grid.
<b>Statutory provisions</b>	<ul style="list-style-type: none"> <li>• Act on Electricity Supply (Bekendtgørelse af lov om elforsyning No. 1115/2006 – general provisions on the supply of electricity)</li> <li>• Order 1063/2010 (Bekendtgørelse om nettilslutning af vindmøller og pristillæg for vindmølleproduceret elektricitet - Order on the Grid Connection of Wind Turbines and Support for Wind-generated Electricity)</li> </ul>

Grid issuesConnection to the grid

Abbreviated form of legal sources	<ul style="list-style-type: none"><li>• Act on Electricity Supply</li><li>• Order 1063/2010</li></ul>	
Contact Authority	Energinet.dk; Energitilsynet	
Procedure	Process flow	<p>The procedural steps are not specified by law. According to Energinet.dk, the procedure to be applied depends on the capacity of a given plant and on the voltage of the grid this plant will be connected to.</p> <p>1) Connection of plants with a capacity of up to 11 kW:</p> <ul style="list-style-type: none"><li>• <b>Application for connection.</b> The installer of the plant submits the application for connection to the grid operator.</li><li>• <b>Installation of the plant.</b></li><li>• <b>Agreement on connection to and use of the grid with the grid operator.</b></li><li>• <b>Registration of the plant.</b></li><li>• <b>Installation of required meters.</b></li><li>• <b>Submission of documents to the grid operator.</b> The plant operator must submit the required information (general and technical specifications) to the grid operator. The grid operator then forwards these documents to Energinet.dk.</li><li>• <b>Permission to operate.</b> The grid operator gives the plant operator permission to operate.</li><li>• <b>Connection to the grid.</b> A plant is connected to the grid after the plant operator has been given permission to operate.</li></ul>

		<p>2) Connection of wind energy plants to the 100 kV grid:</p> <ul style="list-style-type: none"><li>• <b>Application for connection to and use of the grid.</b> The plant operator applies to the grid operator for connection to and use of the grid.</li><li>• <b>Assignment of connection point.</b> The grid operator assigns a connection point to the plant operator and determines the required voltage level.</li><li>• <b>Agreement on connection to and use of the grid with the grid operator.</b></li><li>• <b>Registration of the wind energy plant.</b></li><li>• <b>Installation of the wind energy plant.</b></li><li>• <b>Installation of required meters.</b></li><li>• <b>Agreement with a licensed expert who shall be responsible for balancing the output of the plant.</b></li><li>• <b>Submission of documents to the grid operator.</b> The plant operator must submit the required information (general and technical specifications) to the grid operator. The grid operator then forwards these documents to Energinet.dk.</li><li>• <b>Permission to operate.</b> The grid operator gives the plant operator permission to operate.</li><li>• <b>Connection to the grid.</b> A plant is connected to the grid after the plant operator has been given permission to operate.</li></ul> <p>3) Connection of wind farms to the &gt; 100 kV grid:</p> <ul style="list-style-type: none"><li>• <b>Application for connection.</b> A plant operator shall apply to the transmission grid operator for connection and submit the necessary permits and licences together with the application.</li><li>• <b>Agreement on connection with the grid operator.</b></li><li>• <b>Registration of the wind farm.</b></li><li>• <b>Installation of the wind farm.</b></li><li>• The wind farm operator must submit the <b>documents required for a plant test</b></li></ul>
--	--	---

		<p>to Energinet.dk within 3 months after the wind farm was put into operation.</p> <ul style="list-style-type: none"> <li>• <b>Installation of required meters.</b></li> <li>• <b>Agreement with a licensed expert who shall be responsible for balancing the output of the plants.</b></li> <li>• <b>Commissioning of the plants</b> and commissioning report.</li> <li>• When the plants have been commissioned, the grid operator will give the plant operator <b>temporary permission to operate</b> and submit the technical documents (commissioning report and permission to operate) to Energinet.dk.</li> <li>• Energinet.dk then confirms the <b>temporary permission to operate</b> and approves the documents.</li> <li>• The grid operator gives the plant operator <b>final permission to operate.</b></li> <li>• <b>Connection to the grid.</b> A plant is connected to the grid after the plant operator has been given permission to operate.</li> </ul> <p>Any plant must meet the technical requirements set by the Ministry for Energy (§ 26 Act on Electricity Supply).</p> <p>The grid operator is obliged to connect any wind power plant that fulfils the grid connection requirements (§ 2 par. 2 Order 1063/2010).</p>
<b>Overview</b>	Plant operators are entitled against the grid operator to the connection of their plants to the grid. Electricity from renewable sources is not granted priority connection.	
	<b>Deadlines</b>	No deadlines are specified for the connection procedure.
	<b>Obligation to inform</b>	<p>Plant operators are obliged to submit the general and technical documents required to the grid operator. The grid operator then forwards these documents to Energinet.dk. Apart from that, the owner of a wind turbine is, at any given time, obliged to provide any information necessary for the implementation of grid connection to Energinet.dk, the competent transmission and distribution grid operators or the <b>Danish Energy Agency</b> (§ 18 Order 1063/2010).</p> <p>The grid operator is obliged to provide any owner of a wind plant who requesting grid</p>

		<p>connection with all the necessary information including:</p> <ul style="list-style-type: none"> <li>• a detailed estimate of all expenses for connection;</li> <li>• a reasonable and precise timetable for processing the grid connection application and</li> <li>• a reasonable indicative timetable for grid connection itself (§ 10 Order 1063/2010).</li> </ul>
<b>Priority to renewable energy (qualitative criteria)</b>	<input type="checkbox"/> Priority to renewable energy <input checked="" type="checkbox"/> Non-discrimination	Plants shall be connected according to non-discriminatory procedures (§ 24 par. 2 Act on Electricity Supply).
<b>Capacity limits (quantitative criteria)</b>		
<b>Distribution of costs</b>		
	<b>State</b>	
	<b>Consumers</b>	
	<b>Grid operator</b>	The cost of connecting a wind energy plant is borne by the plant owner and the transmission grid operator (Energinet.dk or an affiliated company) (§ 30 VE-Lov).
	<b>Plant operator</b>	<p>The cost of connecting a plant to the grid is borne by the plant operator. The costs a plant operator has to bear shall not exceed the costs that would be incurred if his plant was connected to the 10-20 kV grid. This rule applies even if the grid operator chooses to connect the plant to a different grid. All other costs, including the expansion and upgrade of the grid, shall be borne by the grid operator (§ 67 Act on Electricity Supply).</p> <p>The cost of connecting a wind energy plant is borne by the plant owner and the transmission grid operator (Energinet.dk or an affiliated company) (§ 30 VE-Lov).</p>

### Use of the grid

<b>Abbreviated form of legal sources</b>	<ul style="list-style-type: none"> <li>Act on Electricity Supply</li> </ul>	
<b>Contact Authority</b>	Energinet.dk; Energitilsynet	
<b>Overview</b>	The plant operator is statutorily entitled against the grid operator to use the grid (§ 24 Act on Electricity Supply). Renewable energy plants shall be given priority use of the grid.	
<b>Procedure</b>	<b>Process flow</b>	A plant operator shall be entitled to use the grid only if his plant complies with the requirements for grid use established by Energinet.dk (§ 26 Act on Electricity Supply).
	<b>Deadlines</b>	
	<b>Obligation to inform</b>	
<b>Priority to renewable energy (qualitative criteria)</b>	(x ) Priority to renewable energy ( ) Non-discrimination	Renewable energy shall be given priority use of the grid (§ 27c par. 5 Act on Electricity Supply).
<b>Curtailment</b>	Plant operators are entitled to priority use of the grid, i.e. in case of capacity shortage they shall have priority use over the producers of electricity from conventional energy sources. Producers of electricity from conventional sources are obliged to reduce their electricity exports if necessary. This principle of priority can be overruled for reasons of network security, i.e. to guarantee the technical quality and the balance of the grid (§ 27c par. 5 Act on Electricity Supply). Apart from that, the premium tariff payments for Anholt off-shore wind farm may be cancelled due to a lack of demand. The bonus for electricity generated at Anholt wind farm will not be paid during hours in which the market price (i.e. the Nordpool spot price) is negative. This can occur when the demand for electricity is lower than the offer (§ 37 par. 5 VE-Lov).	
<b>Distribution of costs</b>

	<b>Consumers</b>	
	<b>Grid operator</b>	
	<b>Plant operator</b>	<p>The cost of grid use is borne by the plant operator, who has to pay use of grid charges (§ 24 Act on Electricity Supply).</p> <p>The cost of grid use by a wind energy plant is borne by the plant operator and the transmission grid operator (Energinet.dk or an affiliated company) (§ 30 VE-Lov).</p>
	<b>European Union</b>	
	<b>Distribution mechanism</b>	

### Grid development

<b>Abbreviated form of legal source</b>	<ul style="list-style-type: none"> <li>Act on Electricity Supply</li> </ul>	
<b>Contact Authority</b>	Energinet.dk; Energitilsynet	
<b>Overview</b>	<p>In general, the grid operators shall act on their own responsibility and expand their grids to the extent necessary. If a grid operator fails to satisfy his obligation to expand the grid, the Ministry for Climate and Energy shall delegate responsibility for the expansion of the grid to Energinet.dk (§ 20 Act on Electricity Supply). The grid operator is not obliged to the plant operators to expand his grid.</p>	
<b>Procedure</b>	<b>Process flow</b>	<p>The grid operator is statutorily obliged to expand the grid if the expansion is necessary to guarantee the efficient transmission of electricity (§ 20 Act on Electricity Supply).</p> <p>The target of increasing the use of renewable energy sources is given special attention whenever necessary (§ 21 Act on Electricity Supply).</p>
	<b>Enforcement of claims</b>	Statutory law does not give rise to an enforceable claim for grid expansion.
	<b>Deadlines</b>	There are no deadlines for grid reinforcement.
	<b>Obligation to inform</b>	
<b>Regulatory incentives for grid expansion and development</b>		
<b>Distribution of costs</b>	<b>State</b>	
	<b>Consumers</b>	In effect, the costs of an expansion of the grid are borne by the consumers (§§ 8, 67 Act)

## RES-LEGAL EUROPE – National Profile Denmark

		on Electricity Supply).
	<b>Grid operator</b>	
	<b>Plant operator</b>	
	<b>European Union</b>	
	<b>Distribution mechanism</b>	The costs of an expansion of the grid are first borne by the grid operator in charge (§ 67 Act on Electricity Supply). The grid operator may then pass on these costs to the consumers (§ 8 par. 7 Act on Electricity Supply). Every consumer is charged an additional fee, the so-called Public Service Obligation (PSO). The fee depends on each consumer's individual level of consumption. The fees are determined by Energinet.dk four times a year. According to Energinet.dk, the fees are then paid to the grid operators.

## RES-H&C support schemes

### Summary of support schemes

Overview	In Denmark there are several taxes on the production, supply and use of energy sources for heating purposes. Renewable energy sources are exempt from these tax obligations. Moreover, the use of biogas for heating purposes is supported through a direct premium tariff.
Summary of support schemes	<b>Tax regulation mechanism</b> – In Denmark, there are different taxes on the production, processing, possession, receipt and dispatch of fossil fuels for heating. Renewable energy sources are exempt from these taxes. <b>Price based mechanism.</b> The use of biogas for heating purposes is supported through a direct premium tariff.
Technologies	All renewable energy technologies are exempt from the tax obligation. Only biogas is eligible for the price based mechanism.

#### Tax regulation mechanism

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>• Act 313/2011</li> <li>• Act 1292/2010</li> <li>• Act 321/2011</li> </ul>	
<b>Contact Authority</b>	Skatteministeriet	
<b>Summary</b>	In Denmark, different taxes are levied on the production, processing, possession, receipt and dispatch of fossil fuels for heating purposes, for example the energy tax on mineral oil products, taxes on coal, lignite and coke or the carbon dioxide tax on certain energy products. Renewable energy sources are exempt from these taxes, as they are not classed as taxable in the specific regulations.	
<b>Eligible technologies</b>	<b>General information</b>	All renewable energy generation technologies are eligible for tax exemption.
	<b>Aerothermal energy</b>	
	<b>Hydrothermal energy</b>	
	<b>Biogas</b>	
	<b>Biomass</b>	
	<b>Geothermal energy</b>	
	<b>Solar thermal energy</b>	
<b>Amount</b>	The amount of tax relief is equal to the tax rate entitled persons are exempt from.	

## RES-LEGAL EUROPE – National Profile Denmark

<b>Addressees</b>	Heating from renewable sources is exempt from these taxes. Companies producing, processing, possessing, receiving or dispatching renewable energy products are exempt from paying tax.

## RES-H&C grid issues

Overview

<b>Overview of grid issues</b>	Due to the nature of heat supply, the connection of a heat generation plant to a district heating network is closely linked to the construction of the plant. Grid connection always involves grid development, since the construction of a plant must occur simultaneously with the development of the district heating grid.
<b>Statutory provisions</b>	<ul style="list-style-type: none"><li>• Act 1184/2011 (Lov om varmforsyning - The Heat Supply Act)</li></ul>

## RES-T support schemes

### Summary of support schemes

<b>Overview</b>	The main incentive for renewable energy use in transport is a quota system. This scheme obliges companies importing or producing petrol, gas or diesel fuels to ensure that biofuels make up a defined percentage of the company's total annual fuel sales. Furthermore, biofuels are supported through tax incentives. Moreover selling of biogas for transport purposes is supported through a direct premium tariff.
<b>Summary of support schemes</b>	<ul style="list-style-type: none"><li>• <b>Tax regulation mechanism.</b> Companies producing, processing, possessing, receiving or dispatching energy products are obliged to pay a defined amount of tax. This amount is reduced for fuels blended with biofuels.</li><li>• <b>Biofuels quota.</b> The main Support schemes for renewable energy sources used in transport is a quota obligation. Companies importing or producing petrol, gas or diesel fuels are obliged to ensure that biofuels make up a defined percentage of the company's total annual fuel sales.</li><li>• <b>Price based mechanism.</b> Selling of biogas for transport purposes is supported through a direct premium tariff.</li></ul>
<b>Technologies</b>	The tax regulation mechanism and the quota obligation apply to biofuels only. Only biogas is eligible for a direct premium tariff.
<b>Statutory provisions</b>	<ul style="list-style-type: none"><li>• Act 674/2011 (Bekendtgørelse af lov om bæredygtige biobrændstoffer og om reduktion af drivhusgasser fra transport – Act on Sustainable Biofuels and the Reduction of Greenhouse Gas Emissions from Transport)</li><li>• Act 321/2011 (Bekendtgørelse af lov om kuldioxidafgift af visse energiprodukter – Act on the Carbon Dioxide Tax on Certain Energy Products)</li><li>• Act 313/2011 (Bekendtgørelse af lov om energiafgift af mineralolieprodukter m.v. – Act on the Energy Tax on Mineral Oil Products and the like)</li><li>• VE-Lov (Lov om fremme af vedvarende energi No. 1392/2008 – Law on the Promotion of Renewable Energy)</li></ul>

## Policies

### Summary of policies

Overview	The following policies aim at promoting the development, installation and use of RES installations: There are 2 training programmes for RES-installers, a certification scheme for wind energy plants, two different research, development and demonstration (RD&D) programmes and an obligation to use renewable heating in new and renovated buildings.
Summary of policies	<ul style="list-style-type: none"> <li>• In general, there are two types of <b>training programmes for installers of RES plants</b>: the Quality Assurance Scheme for the installers of solar heating plants, PV installations and biofuels, and the Heat Pump Scheme covering the installation of heat pumps. Apart from that, the vocational education for specific professions covers all the requirements of the European RES Directive.</li> <li>• The <b>Danish Certification Scheme</b> for wind energy plants comprises two kinds of certification: type certification, which certifies the general type of wind energy plant, and project certification to evaluate individual installations.</li> <li>• There are two types of <b>Research, Development and Demonstration Programmes</b>: “The Energy Technology Development and Demonstration Programme EUDP”, which supports innovative sustainable energy technologies and the “Green Labs DK Programme”, which provides subsidies for the construction of test and demonstration facilities for new sustainable technologies.</li> <li>• The <b>RES-H building obligation</b> obliges owners of new or renovated buildings with a hot water consumption of more than 2,000 litres per day to install solar heating panels.</li> </ul>
Technologies

<b>Name of legal source (original language)</b>	Lov om et Energiteknologisk Udviklings- og Demonstrationsprogram og om Green Labs DK-programmet	Bygningsreglementet 2010	Bekendtgørelse om teknisk certificeringsordning for vindmøller
<b>Full name</b>			
<b>Name (English)</b>	Act on the Energy Technology Development and Demonstration Programme and the Green Labs DK Programme	Building regulations 2010	Executive Order on the Technical Certification of Wind Energy Plants
<b>Abbreviated form</b>	Act 555/2007	Building regulations	Executive Order No. 73/2013
<b>Entry into force</b>	22.06.2007	01.06.2010	01.02.2013
<b>Last amended on</b>	26.04.2011	24.08.2011	
<b>Future amendments</b>			
<b>Purpose</b>	The act introduces a programme to support the development and demonstration of innovative sustainable energy technologies.	Building regulation	The order specifies the technical requirements for wind energy plants.
<b>Relevance for renewable energy</b>	Among other aims, the programme supports innovative RES technologies.	The regulation includes rules for the installation of RES installations in buildings.	This executive order applies to wind energy plants only.

#### Training programmes for installers

Abbreviated form of legal source(s)		
Sector	Electricity, Heating & Cooling, Transport	
Contact Authority	Energistyrelsen	
Description	<p>The training programmes for installers in Denmark are not regulated by law. There are quality assurance agreements between the Danish Technological Institute, installers associations and the Danish Energy Agency.</p> <p>In general, there are two training schemes for installers: the Quality Assurance Scheme (Danish name: KSO) and the Heat Pump Scheme (Danish name: VPO).</p> <ul style="list-style-type: none"> <li>• The KSO scheme applies to the solar heating, solar panel and biofuel sectors. It certifies installers working with these types of installations.</li> <li>• The second scheme – VPO – is a training course for heat pump installers.</li> </ul> <p>Denmark recognises training and certification schemes from other Member States.</p>	
Addressees	RES plant installers	
Competent authority	Danish Energy Agency	
Further information	Further information on both schemes is available at: <a href="http://www.kso-ordning.dk">www.kso-ordning.dk</a> and <a href="http://www.vp-ordning.dk">www.vp-ordning.dk</a> .	
Distribution of costs	State	

## RES-LEGAL EUROPE – National Profile Denmark

	<b>Private Financing</b>	In general, the trainees themselves have to bear the costs of a training course.
	<b>European Union</b>	
	<b>Others</b>	A company which wants its employees to attend a training course may apply for support from a special fund, the Electricity Skills Development Fund (Elbranchens Kompetenceudviklingsfond). The Fund was established by the TEKNIQ (Danish Mechanical and Electrical Contractors' Association) and the Danish Electricity Association (Dansk El-Forbund). Its aim is to provide funding for the training of employees. The Fund may grant 500 DKK (approx. € 67) per training day and participating employee.

**Certification Programmes for RES installations (Danish Certification Scheme for Wind Energy Plants)**

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>Executive Order No. 73/2013</li> </ul>
<b>Sector</b>	Electricity
<b>Contact Authority</b>	Energistyrelsen
<b>Description</b>	<p>The goal of the certification scheme for wind energy plants is to ensure that on and off shore wind power plants meet the requirements laid down for energy production, safety and the environment, as well as that wind power plants are maintained as prescribed (§ 1 Executive Order No. 73/2013).</p> <p>Manufacturers and suppliers of wind power plants shall, before putting it on the market or into service, ensure that the plant carries a CE marking and is accompanied by an EC declaration of conformity upon delivery to meet the requirements for safety and health, with regulations on the design of technical aids (§ 3 par. 1 Executive Order No. 73/2013).</p> <p>The certification of wind turbines with a rotor of 40 m<sup>2</sup> must be at least equivalent to those required modules and requirements for type or prototype certification specified in the European standard DS / EN 61400-22, including DS/EN-, IEC - and ISO standards specified in annex 1 of the Executive Order (§ 5 par. 1 Executive Order No. 73/2013).</p> <p>The certification of wind turbines with a rotor area of 5 to 40 m<sup>2</sup> must be at least equivalent to those set out in Annex 1 of the Executive Order (§ 5 par. 2 Executive Order No. 73/2013).</p> <p>The certification must also include noise measurements carried out in accordance with the current regulation on noise from wind turbines (§ 5 par. 3 Executive Order No. 73/2013).</p>
<b>Addressees</b>	Type certification for wind turbines shall be issued to the manufacturers or suppliers of wind energy plants (§ 3 par. 1 Executive Order No. 73/2013)

## RES-LEGAL EUROPE – National Profile Denmark

<b>Competent authority</b>	<p>The certification scheme is managed by the 'Energy Agency's Secretariat for the Danish Wind Turbine Certification Scheme' at Risø National Laboratory for Sustainable Energy (Technical University of Denmark) (§ 13 Executive Order No. 73/2013).</p> <p>The bodies responsible for assigning certificates of approval to wind energy plants must be accredited by the Danish Accreditation and Metrology Fund (Danske Akkrediterings- og Metrologifond) – DANAK or by an equivalent recognised international accreditation company (§ 11 par. 1 Executive Order No. 73/2013).</p>

**RD&D Policies (Forsk-El Programme - Support for research and development of environmentally friendly power generation technologies)**

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>• VE-Lov</li> </ul>
<b>Sectors</b>	Electricity
<b>Contact Authority</b>	Energinet.dk
<b>Description</b>	Energinet.dk provides funding for a support research programme, which aims at supporting the development and integration of environmentally friendly power generation technologies for grid connection. Each year a call for funding is implemented. ForskEL is financed through a so-called Public Service Obligation (PSO), which is paid by final energy consumers.
<b>Addressees</b>	
<b>Competent authority</b>	The transmission grid operator Energinet.dk is in charge of the subsidies.
<b>Further information</b>	Further information is available at: <a href="http://energinet.dk/EN/FORSKNING/ForskEL-programmet/Sider/default.aspx">http://energinet.dk/EN/FORSKNING/ForskEL-programmet/Sider/default.aspx</a> or <a href="https://www.forskel.dk/Pages/default.aspx">https://www.forskel.dk/Pages/default.aspx</a>

**RD&D Policies (The Energy Technology Development and Demonstration Programme EUDP)**

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"><li>• Act 555/2007</li></ul>
<b>Sectors</b>	Electricity, Heating & Cooling, Transport
<b>Contact Authority</b>	Energistyrelsen
<b>Description</b>	<p>The programme “Energiteknologisk Udviklings- og Demonstrationsprogram” (EUDP) supports the development, demonstration and market-introduction of innovative sustainable energy technologies (§ 2 Act 555/2007). The aim of this programme is to promote the efficient use of energy and help Denmark to become independent from fossil energy by 2050.</p> <p>Funding will be allocated through a tender process. The tenders will take place 2-3 times a year. The decisions on the amount of funding to be provided and the projects to be supported are made by an independent committee appointed by the Minister of Climate, Energy and Building.</p> <p>The precondition for receiving grants is that a private investor or applicant’s partner is willing to finance more than a half of the project and to commercialise its results.</p>
<b>Addressees</b>	The eligible addressees are public or private companies or knowledge institutions (§ 7 Act 555/2007).
<b>Competent authority</b>	Danish Energy Agency
<b>Further information</b>	Further information is available at: <a href="http://www.ens.dk/DA-DK/NYTEKNOLOGI/OM-EUDP/Sider/Forside.aspx">http://www.ens.dk/DA-DK/NYTEKNOLOGI/OM-EUDP/Sider/Forside.aspx</a>

RD&D Policies (Green Labs DK Programme)

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>Act 555/2007</li> </ul>
<b>Sectors</b>	Electricity, Heating & Cooling, Transport
<b>Contact Authority</b>	Klima- og Energiministeriet
<b>Description</b>	<p>The Green Labs DK Programme grants subsidies for the construction of large-scale test and demonstration facilities for new sustainable technologies (§ 2a Act 555/2007).</p> <p>The scheme provides grants to a small number of green labs, where companies can test and demonstrate new green technologies under realistic circumstances. The programme supports green labs using all types of technology that can help Denmark become independent from fossil fuels. These are, first and foremost, energy efficiency and renewable technologies.</p> <p>The programme's budget is 210 million DKK (approx. 28 million €) for a period of two years, from 2010 to the end of 2012.</p>
<b>Addressees</b>	The eligible addressees are public or private companies and knowledge institutions (§ 7 Act 555/2007).
<b>Competent authority</b>	<p>The Green Labs DK Programme is run by an independent board appointed by the Minister of Climate, Energy and Construction (§ 3 Act 555/2007).</p> <p>The Secretariat of Green Labs DK is a part of the Danish Energy Agency and is responsible for the daily operation of the programme.</p>

**RES-H building obligations**

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"><li>• Building Regulations</li></ul>
<b>Sectors</b>	Heating & Cooling
<b>Contact Authority</b>	Erhvervsstyrelsen
<b>Description</b>	The 2010 Building Regulations oblige owners of new or renovated buildings with a hot water consumption of more than 2000 litre per day to install solar heating panels. These panels shall cover an energy demand equivalent to the hot water consumption under normal operating conditions. This obligation does not apply to buildings using direct heating (Building Regulations art. 8.6.2. par. 2)
<b>Obligated entities</b>	According to the Building Act, the owner of the building is responsible for fulfilling the obligations of the Danish building regulations.
<b>Competent authority</b>	The Danish Enterprise and Construction Authority
<b>Further information</b>	<a href="http://www.bygningsreglementet.dk/">http://www.bygningsreglementet.dk/</a>
<b>Obligation on regional level</b>	No obligations on the regional level.

**Support of RES-H infrastructure**

<b>Abbreviated form of legal source(s)</b>	
<b>Sectors</b>	Heating & Cooling
<b>Contact Authority</b>	Klima- og Energiministeriet
<b>Description</b>	In Denmark, support for RES-H infrastructure is provided only on the local level. The Ministry of Climate and Energy encourages local authorities to support projects that promote the use of district heating.
<b>Addressees</b>	
<b>Competent authority</b>	Ministry of Climate and Energy and District Councils
<b>Further information</b>
