### **Spain – summary text**

In Spain, the main support scheme (the “Régimen Especial”) operated until the end of 2011 and was suspended at the beginning of 2012. As of now, no other support schemes for RES-E are in place. A tax regulation system for investments related to RES-E plants is in place. There is a tax credit for solar thermal and for biofuels in transport. Furthermore a quota system for biofuels is in place.

RES-E operators are entitled to grid connection, priority dispatch against the grid operator. Furthermore, a plant operator may be contractually entitled against the grid operator to an expansion of the grid, if the expansion is required for his plant to be connected to the grid

Policies for training and certification of solar panel installers are in place. Buildings should satisfy a minimal solar contribution of warm sanitary water. An overarching RD&D plan is in place that directs support to RES-E, RES-H&C and RES-T.

## RES-E support schemes

### Summary of support schemes

Overview	<p>In Spain, the generation of electricity from renewable sources is mainly promoted through a price regulation system. Plant operators may choose between two options: a guaranteed feed-in tariff and a guaranteed bonus (premium) paid on top of the electricity price achieved on the wholesale market. <b>The price regulation system is currently suspended through Real Decreto-ley 1/2012</b>, i.e. no new installation can access the scheme. The reason for this suspension is traced in the preamble of RDL 1/2012. RD 6/2009 established that by 2013 a part of the consumers' electricity bill (the "peajes the acceso") should be able to fully balance the costs incurred by the State arising from the support scheme. It is deemed, however, that the present situation will not allow this goal to be reached by 2013. For this reason, and together with the high growth of RES-E in the past years, even beyond the set goals, all support schemes for RES-E were suspended by RDL 1/2012.</p>
Summary of support system	<p><b>Price regulation</b> (currently suspended). In Spain, the generation of electricity from renewable sources is promoted through a price regulation system. Plant operators may choose between a feed-in tariff and a bonus, which is paid on top of the electricity price achieved in the wholesale market (arts.1, 24 RD 661/2007). This system only applies to those amounts of electricity that are within the statutory maximum production capacities set for each individual technology (arts. 37 to 42 RD 661/2007; arts. 10, 5 RD 1578/2008). Both the feed-in tariff and the bonus regulated are by RD 661/2007 and are thus subject to similar legal provisions.</p> <p><b>Tax regulation mechanisms.</b> Until 31 December 2012, all entities whose income is below € 71,007.20 per year were entitled to a tax credit equal to 20% of all investments related to the use of renewable energy or similar measures in their building of residence.</p>
Technologies	In general, all technologies are eligible.
Statutory provisions	<ul style="list-style-type: none"> <li>RD 661/2007 (Real Decreto 661/2007, de 25 de mayo, por el que se regula la actividad de producción de energía eléctrica en régimen especial – Royal Decree on electricity production through a special feed-in</li> </ul>

	<p>tariff scheme ("Régimen Especial").</p> <ul style="list-style-type: none"> <li>• RD 1578/2008 (Real Decreto 1578/2008, de 26 de septiembre, de retribución de la actividad de producción de energía eléctrica mediante tecnología solar fotovoltaica para instalaciones posteriores a la fecha límite de mantenimiento de la retribución del Real Decreto 661/2007, de 25 de mayo, para dicha tecnología - Royal Decree on photovoltaic electricity generation)</li> <li>• Ley 54/1997 (Ley del Sector Eléctrico – Law on the Electricity Sector)</li> <li>• Ley 35/2006 (Ley del Impuesto sobre la Renta de las Personas Físicas y de modificación parcial de las leyes de los Impuestos sobre Sociedades, sobre la Renta de no Residentes y sobre el Patrimonio - Law No. 35/2006 of 28th November 2006 on the Tax on Income of Natural Persons, and on Changes to the Laws on Taxes on Companies, on Income of Non-residents and on Property)</li> <li>• RD 1955/2000 (Real Decreto 1955/2000, de 1 de diciembre, por el que se regulan las actividades de transporte, distribución, comercialización, suministro y procedimientos de autorización de instalaciones de energía eléctrica – Royal Decree on the Distribution and Transmission of Electricity)</li> <li>• Real Decreto 2017/1997 (Real Decreto 2017/1997, de 26 de diciembre, por el que se organiza y regula el procedimiento de liquidación de los costes de transporte, distribución y comercialización a tarifa, de los costes permanentes del sistema y de los costes de diversificación y seguridad de abastecimiento - Royal Decree No. 2017/1997 of 26th December 1997 Organising and Regulating the Procedures for the Liquidation of Costs related to Transport, Distribution and Commercialisation, of Permanent System Costs, and of Costs related to Diversification and Security of Supply.)</li> <li>• RDL 1/2012 (Real Decreto-ley por el que se procede a la suspensión de los procedimientos de preasignación de retribución y a la supresión de los incentivos económicos para nuevas instalaciones de producción de energía eléctrica a partir de cogeneración, fuentes de energía renovables y residuos - Royal legislative decree 1/2012 of 27th January, suspending the pre-assignment proceedings for compensation and the block of support schemes for new RES.E installations).</li> <li>• RDL 6/2009 (Real Decreto-ley 6/2009, de 30 de abril, por el que se adoptan determinadas medidas en el sector energético y se aprueba el bono social - Royal legislative decree 6/2009 of 30 April 2009, approving specific measures in the energy sector and the social bonus)</li> <li>• RDL 2/2013 (Real Decreto-ley 2/2013, de 1 de febrero, de medidas urgentes en el sistema eléctrico y en el sector financiero. - Royal decree-law 2/2013 of 1<sup>st</sup> of February, for urgent measures in the electric</li> </ul>

## RES-LEGAL EUROPE – National Profile Spain

<b>Entry into force</b>	01.06.2007	28.09.2008	29.11.1997	29.11.2006
<b>Last amended on</b>	02.02.2013	14.01.2013	31.12.2012	23.02.2013
<b>Future amendments</b>				
<b>Purpose</b>	Establishing legal and economic provisions for electricity producers under "Régimen Especial".	Regulating photovoltaic electricity generation.	Regulating the electricity sector	Act No. 35/2006 includes important amendments to Spanish business tax law as regards the promotion of renewable energy.
<b>Relevance for renewable energy</b>	This Decree directly promotes the generation of electricity from renewable energy sources.	This decree stipulates that operators of renewable electricity generation plants that would like to benefit from RD 661/2007 have to register their plants with a preliminary register (art. 4 RD 1578/2008).	This law also applies to plants that generate electricity from renewable sources (Articles 27-31).	This Act provides tax incentives for investments in renewable energy.

Name of legal source (original language)	Real Decreto 1955/2000	Real Decreto 2017/1997	Real Decreto-ley 1/2012	Real Decreto-ley 6/2009
Full name	Real Decreto 1955/2000, de 1 de diciembre, por el que se regulan las actividades de transporte, distribución, comercialización, suministro y procedimientos de autorización de instalaciones de energía eléctrica	Real Decreto 2017/1997, de 26 de diciembre, por el que se organiza y regula el procedimiento de liquidación de los costes de transporte, distribución y comercialización a tarifa, de los costes permanentes del sistema y de los costes de diversificación y seguridad de abastecimiento	Real Decreto-ley 1/2012, de 27 de enero, por el que se procede a la suspensión de los procedimientos de preasignación de retribución y a la supresión de los incentivos económicos para nuevas instalaciones de producción de energía eléctrica a partir de cogeneración, fuentes de energía renovables y residuos.	Real Decreto-ley 6/2009, de 30 de abril, por el que se adoptan determinadas medidas en el sector energético y se aprueba el bono social.
Name (English)	Royal Decree No. 1955/2000 of 1 December on the Transmission, Distribution, Marketing, and Supply of Electricity and the Authorisation Procedure for Electricity Generation Plants	Royal Decree No. 2017/1997 of 26 December 1997 Organising and Regulating the Procedures for the Liquidation of Costs related to Transport, Distribution and Commercialisation, of Permanent System Costs, and of Costs related to Diversification and Security of Supply.	Royal legislative decree 1/2012 of 27 January, suspending the pre-assignment proceedings for compensation and the block of support schemes for new RES.E installations.	Royal legislative decree 6/2009 of 30 April 2009, approving specific measures in the energy sector and the social bonus
Abbreviated form	RD 1955/2000	RD 2017/1997	RDL 1/2012	RDL 6/2009

## RES-LEGAL EUROPE – National Profile Spain

<b>Entry into force</b>	16.01.2001	01.01.1998	28.01.2012	07.05.2009
<b>Last amended on</b>	14.01.2013	07.12.2011		27.03.2012
<b>Future amendments</b>				
<b>Purpose</b>	Regulating the connection and access of electricity to the grid and the transmission and distribution of electricity.	Securing a free and transparent electricity market through a framework of provisions on the generation and sale of electricity.	Halting support schemes and incentives for new RES-E installations.	To approve specific measures in the energy sector and the social bonus
<b>Relevance for renewable energy</b>	This decree also applies to plants that generate electricity from renewable energy sources.	This Decree applies to electricity generated from all primary sources of energy. RD 2017/1997 regulates the distribution of the costs incurred to the grid operator as a result of the promotion of electricity from renewable sources.	This decree stops the incentive scheme of “Regimen especial” for RES-E plants.	Introduction of pre-assignment registers.

Summary	<p><b>This incentive scheme has been currently suspended by RDL 1/2012 and no new installations can access this scheme. The re-opening date of the scheme has not yet been set.</b></p> <p>In Spain, the generation of electricity from renewable sources is mainly promoted through a price regulation system.</p> <ul style="list-style-type: none"> <li>• <b>Plant capacity must not exceed 50 MW.</b> Only plants whose capacity does not exceed 50 MW are eligible (art. 27 Ley 54/1997). Moreover, a plant's capacity shall be within the statutory maximum capacity set for the respective source of energy.</li> <li>• <b>Guaranteed Feed-in tariff for solar power.</b> Electricity generated by photovoltaic plants shall be purchased at a guaranteed feed-in tariff, which is adjusted for new plants every quarter (RD 1578/2008).</li> <li>• <b>Right to choose for plants that generate up to 50 MW.</b> Operators of plants that generate electricity from renewable sources other than photovoltaic energy and whose capacity does not exceed 50 MW may choose between the guaranteed feed-in tariff and a bonus, which is paid on top of the price achieved in the free market (art. 24 RD 661/2007 in connection with art. 45 RD 661/2007).</li> <li>• <b>Bonus for plants that generate 50 to 100 MW.</b> Operators of plants whose capacity is 50 to 100 MW are only</li> </ul>

## RES-LEGAL EUROPE – National Profile Spain

	<p>entitled to a bonus for high plant efficiency and for the use of reactive energy (art. 28, 29 RD 661/2007), which is paid on top of the sale price.</p> <p>Except for operators of solar power installations, plant operators may choose between two feed-in tariffs. A plant operator's decision is binding for one year (art. 24, art. 26 par. 3 RD 661/2007).</p> <ul style="list-style-type: none"> <li>• <b>Guaranteed feed-in tariff.</b> RD 661/2007 provides guaranteed tariffs in terms of state-regulated minimum tariffs for each source of energy (arts. 35-43 RD 661/2007).</li> <li>• <b>Variable feed-in tariff.</b> Operators of hydro-electricity and biomass plants may also opt for a variable, time-dependent tariff, which is set by statutory law. This tariff is composed of different elements, which depend on the time of day and the season (art. 26 RD 661/2007 in connection with First Final Provision of RD 1578/2008).</li> </ul>	
Eligible technologies	General information	<p>In Spain, all technologies are generally eligible, with the following exceptions:</p> <ul style="list-style-type: none"> <li>• <b>Technology-specific capacity limits.</b> If the market cap set by the government for the respective plant type is reached, the exceeding amount of electricity will not be eligible for subsidies (art. 22, 35-42 RD 661/2007; arts. 5, 10 RD 1578/2008).</li> <li>• <b>Plant-specific capacity limits.</b> All plants that generate electricity from renewable sources and whose installed capacity does not exceed 50 MW are eligible for support (art. 27.1 Ley 54/1997; art. 45 RD 661/2007). Plants whose capacity exceeds this limit are not eligible.</li> <li>• <b>Direct sales.</b> In pursuance of "Régimen Especial", electricity that is transferred and sold directly is not eligible for subsidies (§ 24 par. 3 RD 661/2007).</li> </ul>
	Wind energy	Both onshore and offshore wind energy plants are eligible until the market cap of 20,155 MW of installed capacity is reached (art 38 RD

## RES-LEGAL EUROPE – National Profile Spain

		661/2007).
	<b>Solar energy</b>	PV and solar thermal are eligible. The capacity limits for the different installation types are re-defined during the review of the application conditions every quarter (art. 5 RD 1578/2008, Annex III RD 1578/2008). Prior to the end of an application period, the market caps specified for each installation type are published on the website of the Ministry of Industry, Tourism and Trade (art. 5 RD 1578/2008).
	<b>Geothermal energy</b>	Eligible, including hot-dry-rock energy (art. 2 RD 661/2007). Statutory law does not specify a market cap.
	<b>Biogas</b>	Eligible, if the main fuel is bio-fuel or biogas from anaerobic digestion of agricultural and livestock wastes, bio-degradable industrial waste and sewage sludge or landfill gas. Biogas and biomass from manure are eligible for subsidies until the cap of 250 MW (for both sources combined) is reached (arts. 2, 41 RD 661/2007).
	<b>Hydro-power</b>	Plants whose primary source of energy is wave energy, tidal energy, ocean thermal energy and ocean current energy are eligible. Traditional hydro-electric stations are also eligible, if their entry capacity does not exceed 50 MW (arts. 2 b) 3, 45.2 RD 661/2007). Hydro-electricity plants that generate up to 10 MW are eligible for subsidies until the market cap of 2,400 MW is reached (art. 40 RD 661/2007).
	<b>Biomass</b>	Eligible. Biomass from energy crops, agricultural or gardening waste, residues from forest harvesting, other silvicultural operations in woodlands and agricultural areas, or waste from industrial plants are eligible for subsidies until the total capacity reaches 1371 MW (arts.

## RES-LEGAL EUROPE – National Profile Spain

		<p>2, 41 RD 661/2007).</p> <p>Biomass from manure and biogas are eligible for subsidies until the total capacity (of both sources) reaches 250 MW (arts. 2, 41 RD 661/2007).</p>
Amount	General information	The tariff differs according to the source of energy (arts. 35, -44 RD 661/2007 in connection with the website of the Ministry of Industry, Tourism and Trade). The guaranteed feed-in tariffs for the individual renewable energy sources are listed below.
	Wind energy	<p><b>Wind (onshore) – category b.2.1 in RD 661/2007.</b></p> <ul style="list-style-type: none"> <li>for 20 years: €ct 8.1270 per kWh</li> <li>from the 21st year onwards: €ct 6.7921 per kWh</li> </ul>
	Solar energy	<p><b>PV (art. 11 RD 1578/2008).</b></p> <ul style="list-style-type: none"> <li>for 25 years: €ct 12.1716 – 26.6208 per kWh (depending on installation size and location)(art. 12 RD 1578/2008 in conjunction with the website of the Ministry of Industry, Tourism and Trade).</li> </ul> <p><b>Solar-thermal generation – category b.1.2 in RD 661/2007.</b></p> <ul style="list-style-type: none"> <li>for 25 years: €ct 29.8957per kWh</li> <li>from the 26th year onwards: €ct 23.9164 per kWh</li> </ul>
	Geothermal energy	<p><b>Geothermal power – category b.3 in RD 661/2007.</b></p> <ul style="list-style-type: none"> <li>for 20 years: €ct 7.6467 per kWh</li> <li>from the 21st year onwards: €ct 7.2249 per kWh</li> </ul>
	Biogas	<p><b>Biogas – categories b.7.1 and b.7.2 in RD 661/2007.</b></p> <ul style="list-style-type: none"> <li>for 15 years: €ct 8.8697 – 14.5042 per kWh (depending on</li> </ul>

## RES-LEGAL EUROPE – National Profile Spain

		<p>plant size)</p> <ul style="list-style-type: none"> <li>from the 16th year onwards: €ct 7.2249 per kWh</li> </ul>
	<b>Hydro-power</b>	<p><b>Hydro-electricity (up to 10 MW) – category b.4 in RD 661/2007.</b></p> <ul style="list-style-type: none"> <li>for 25 years: €ct 8.6565 per kWh</li> <li>from the 26th year onwards: €ct 7.7909 per kWh</li> <li>Plant capacities of 10 -50 MW are subject to the formula laid down in art. 36 RD 661/2007.</li> </ul> <p><b>Wave and tidal – category b.3 in RD 661/2007.</b></p> <ul style="list-style-type: none"> <li>for 20 years: €ct 7.6467 per kWh</li> <li>from the 21st year onwards: €ct 7.2249 per kWh</li> </ul>
	<b>Biomass</b>	<p><b>Biomass – categories b.6, b.7.3 and b.8 in RD 661/2007.</b></p> <ul style="list-style-type: none"> <li>for 15 years: €ct 5.9487 – 17.6339 per kWh (depending on energy source and plant size)</li> <li>from the 16<sup>th</sup> year onwards: €ct 5.9487 – 13.0882 per kWh (depending on energy source and plant size)</li> </ul>
<b>Degression</b>	<b>General information</b>	<p>Since February 2013 the actualisation method of tariffs is linked to a specific index (Índice de precios de consume a impuestos constantes sin alimentos no elaborados ni productos energeticos) and not to the Price consumer index. This changes the actualisation method of tariffs for all plants retroactively (Art. 1 RDL 2/2013). Adjusted tariffs are published on the website of the Ministry of Industry, Energy and Tourism.</p>

### Premium tariff

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> <li>• RD 661/2007</li> <li>• RD 1578/2008</li> <li>• Ley 54/1997</li> <li>• RD 1955/2000</li> <li>• RD 2017/1997</li> <li>• RD 6/2009</li> <li>• RDL 1/2012</li> <li>• RDL 2/2013</li> </ul>	
Contact Authority	<a href="http://www.minetur.gob.es/">http://www.minetur.gob.es/</a>	
Summary	<p>This incentive scheme has been currently suspended by RDL 1/2012 and no new installations can access this scheme. The re-opening date of the scheme has not yet been set.</p> <p>In Spain, the generation of electricity from renewable sources is mainly promoted through a price regulation system.</p> <ul style="list-style-type: none"> <li>• <b>Plant capacity must not exceed 50 MW.</b> Only plants whose capacity does not exceed 50 MW are eligible (art. 27 Ley 54/1997). A plant's capacity shall also be within the statutory maximum capacity set for the respective source of energy.</li> <li>• <b>Right to choose for plants that generate up to 50 MW.</b> Operators of plants that generate electricity from renewable sources other than photovoltaic energy and whose capacity does not exceed 50 MW may choose between the guaranteed feed-in tariff and a bonus, which is paid on top of the price achieved in the free market (art. 24 RD 661/2007 in connection with art. 45 RD 661/2007).</li> <li>• <b>Bonus for plants that generate 50 to 100 MW.</b> Operators of plants whose capacity is 50 to 100 MW are only entitled to a bonus for high plant efficiency and for the use of reactive energy (art. 28, 29 RD 661/2007). This bonus is paid on top of the sale price.</li> </ul>	
Eligible technologies	General information	In Spain, all technologies are generally eligible, with the following exceptions:

		<ul style="list-style-type: none"> <li>• <b>Technology-specific capacity limits.</b> If the market cap set by the government for the respective plant type is reached, the exceeding amount of electricity will not be eligible for subsidies (art. 22, 35-42 RD 661/2007; arts. 5, 10 RD 1578/2008).</li> <li>• <b>Plant-specific capacity limits.</b> All plants that generate electricity from renewable sources and whose installed capacity does not exceed 50 MW are eligible for promotion (art. 27.1 Ley 54/97; art. 45 RD 661/2007). Plants whose capacity exceeds this limit are not eligible.</li> <li>• <b>Direct sale.</b> In pursuance of "Régimen Especial", electricity that is transferred and sold directly is not eligible for subsidies (§ 24 par. 3 RD 661/2007).</li> </ul>
	Wind energy	Both onshore and offshore wind energy plants are eligible until the market cap of 20.155 MW of installed capacity is reached (arts. 2, 38 RD 661/2007).
	Solar energy	Only Solar-thermal installations are eligible (art. 2 RD 661/2007). PV plants are regulated by RD 1578/2008, which only allows for a feed-in tariff regime for PV plants.
	Geothermal energy	Eligible, including hot-dry-rock energy (art. 2 RD 661/2007). Statutory law does not specify a market cap.
	Biogas	Eligible, if the main fuel is bio-fuel or biogas from anaerobic digestion of agricultural and livestock wastes, bio-degradable industrial waste and sewage sludge, or landfill gas. Biogas and biomass from manure are eligible for subsidies until the cap of 250 MW (for both) is reached (arts. 2, 41 RD 661/2007).

## RES-LEGAL EUROPE – National Profile Spain

	<b>Hydro-power</b>	Plants whose primary source of energy is wave energy, tidal energy, ocean thermal energy or ocean current energy are eligible. Traditional hydro-electric stations are also eligible if their entry capacity does not exceed 50 MW (arts. 2 b) 3, 45.2 RD 661/2007). Hydro-electricity plants that generate up to 10 MW are eligible for subsidies until the market cap of 2,400 MW is reached (art. 40 RD 661/2007).
	<b>Biomass</b>	Eligible. Biomass from energy crops, agricultural or gardening waste, residues from forest harvesting, other silvicultural operations in woodlands and agricultural areas or waste from industrial plants are eligible for subsidies until the total capacity reaches 1371 MW (arts. 2, 41 RD 661/2007). Biomass from manure and biogas are eligible for subsidies until the total capacity (of both sources) reaches 250 MW (arts. 2, 41 RD 661/2007).
<b>Amount</b>	<b>General information</b>	The premium tariff level is set to €ct. 0 per kWh for all technologies (Art. 35,36 RD 661/2007 in conjunction with Art. 2 RDL 2/2013)
	<b>Wind energy</b>	€ct. 0 per kWh (Art. 35,36 RD 661/2007 in conjunction with Art. 2 RDL 2/2013)
	<b>Solar energy</b>	PV installations are not eligible. The tariff for <b>solar-thermal installations (category b.1.2 in RD 661/2007)</b> is €ct. 0 per kWh (Art. 35,36 RD 661/2007 in conjunction with Art. 2 RDL 2/2013)
	<b>Geothermal energy</b>	€ct. 0 per kWh (Art. 35,36 RD 661/2007 in conjunction with Art. 2 RDL 2/2013)
	<b>Biogas</b>	€ct. 0 per kWh (Art. 35,36 RD 661/2007 in conjunction with Art. 2 RDL 2/2013)
	<b>Hydro-power</b>	€ct. 0 per kWh (Art. 35,36 RD 661/2007 in conjunction with Art. 2 RDL 2/2013)

## RES-E grid issues

### Overview

<b>Overview of grid issues</b>	<p>In Spain, renewable energy plants are statutorily entitled to priority access to, connection to and use of the grid. Renewable electricity is granted priority dispatch in the electricity markets at no cost, provided the stability and security of the grid infrastructure can be maintained. Renewable energy plants operate under the so-called “Special Regime”. Real Decreto 1/2012 partially modified and suspended parts of this regime, however exclusively in economic terms (support schemes). As regards connection, use and development of the grid with respect to RES-E, Real Decreto 1/2012 has no effect, as confirmed by the National Energy Commission (CNE).</p> <p>Plant operators may be contractually entitled to the expansion of the grid. If the expansion is required for a plant to be connected to the grid, the operator of the plant shall bear the costs of the expansion works (“deep” connection charges). Apart from that, the grid operator is obligated to expand his grid in compliance with the general legislation on energy.</p>
<b>Connection to the grid</b>	Plant operators are contractually entitled against the grid operator to priority access and connection of their plants to the grid.
<b>Use of the grid</b>	Plant operators are contractually entitled to priority use of the grids export and transmit electricity until grid capacity is used up and as long as stability is maintained.
<b>Grid development</b>	Plant operators may be contractually entitled to the expansion of the grid. If the expansion is required for a plant to be connected to the grid, the grid operator shall bear the costs of the expansion works. Apart from that, the grid operator is obliged to expand his grid in compliance with the general legislation on energy.
<b>Statutory provisions</b>	<ul style="list-style-type: none"> <li>• Ley 54/1997 (Ley del Sector Eléctrico – Law on the Electricity Sector)</li> <li>• RD 1955/2000 (Real Decreto 1955/2000, de 1 de diciembre, por el que se regulan las actividades de transporte, distribución, comercialización, suministro y procedimientos de autorización de instalaciones de energía eléctrica – Royal Decree on the Distribution and Transmission of Electricity)</li> </ul>

## RES-LEGAL EUROPE – National Profile Spain

## Grid issues

### Connection to the grid

<b>Abbreviated form of legal sources</b>	<ul style="list-style-type: none"> <li>• RD 1955/2000</li> <li>• RD 661/2007</li> <li>• L 54/1997</li> </ul>	
<b>Contact Authority</b>	<a href="http://www.cne.es/">http://www.cne.es/</a>	
<b>Overview</b>	<p>Any producer of electricity is entitled to connection (Art. 24, par.1, L 54/1997 and Artt. 53, 62, RD 1955/2000). The operators of renewable energy plants are entitled against the grid operator to connection to the grid (art. 17 RD 661/2007). Entitled party. The persons entitled are operators of plants that come under the so-called “Special Regime” (“Régimen Especial”), (art. 2 RD 661/2007). The electricity generation plants entitled to Régimen Especial are those that respect the following conditions:</p> <ul style="list-style-type: none"> <li>• Technologies: The plants' primary source of energy shall be a renewable source of energy as defined by statutory law (art. 2 par. 1 no. 2 b RD 661/2007).</li> <li>• Classification by the authorities: Plants shall be officially notified of their admission to Régimen Especial (art. 6-14 RD 661/2007).</li> <li>• Obligated party. The person obligated is the grid operator (Artt. 53, 62, RD 1955/2000 and art. 17 RD 661/2007).</li> </ul>	
<b>Procedure</b>	<b>Process flow</b>	<p>In general, the procedure for access and connection consists of the following steps:</p> <ul style="list-style-type: none"> <li>• Application for access point</li> <li>• Provisional assignation of access point</li> <li>• Connection request</li> <li>• Negotiation of connection contract</li> <li>• Agreement and signature of contract</li> <li>• Execution of connection works</li> </ul>

		<ul style="list-style-type: none"> <li>• Connection</li> </ul> <p>The procedure for connecting RES installations to the distribution or transmission grid, are established in articles 53 to 66 of RD 1995/2000 and in Annex XI of RD 661/2007. Additionally, Red Eléctrica de España's P.O.s (Procedimiento de Operación) 12.1 and 12.2 further define the technical and procedural rules for connection to the transmission infrastructure.</p>
	<b>Deadlines</b>	<p>For the connection to the transmission grid, the deadlines are set in articles 53,57,58 and 59 of RD 1955/2000:</p> <ul style="list-style-type: none"> <li>• Once the transmission grid operator receives from an applicant an access and connection request, it shall respond on the feasibility of access and connection within 2 months.</li> <li>• Successively, the applicant has to request connection from the owner of the access point, who shall produce a technical report and pass it to the transmission grid operator within 1 month. The transmission grid operator shall assess and finally accept the report within another month.</li> <li>• The transmission grid operator and the applicant shall then negotiate and agree on the connection contract within one month. Thereafter, the connection works may start. The connection contract shall not be signed unless all administrative authorisations for the connection works have been obtained.</li> </ul> <p>For the connection to the distribution grid, the deadlines are set in articles 62,63 and 66 of RD 1955/2000:</p> <ul style="list-style-type: none"> <li>• Once a distribution grid operator receives from an applicant a request for access to its infrastructure, it shall respond whether there is sufficient access capacity within 15 days. The distribution grid operator shall forward to the transmission</li> </ul>

## RES-LEGAL EUROPE – National Profile Spain

		<p>grid operator all access requests that may have an influence on the transmission infrastructure as established in article 63 of RD 1955/2000.</p> <ul style="list-style-type: none"> <li>• A positive access capacity response from a distribution grid operator will have a validity of 6 months. During this period, the applicant may request connection.</li> <li>• Where a distribution grid operator receives a connection request that might have an influence on the transmission grid infrastructure, the distribution grid operator shall inform the transmission grid operator within one month, who shall respond on the feasibility of the connection within two months. The distribution grid operator shall then inform the applicant.</li> <li>• The distribution grid operator and the applicant may then, in case of a positive response, enter in the contract negotiation phase.</li> </ul> <p>Plants shall be connected to the grid after the contract on the technical conditions has been concluded (art. 58 RD 1955/2000) and a bank guarantee of € 500 per kW of installed capacity for photovoltaic installations and € 20 per kW for other plants has been provided (art. 66 bis RD 1955/2000).</p>
	<b>Obligation to inform</b>	<p>The transmission grid operator and distribution grid operators are obliged to explain the cases where access to the grid was denied and to provide alternative access points. The transmission grid operator and the distribution grid operators also have to make publicly available the information on all access and connection requests in their areas of competence (articles 53, 62 RD 1955/2000).</p>
<b>Priority to renewable energy</b>  <b>(qualitative criteria)</b>	(X) Priority to renewable energy  ( ) Non-discrimination	Renewable energy plants shall be given priority connection, i.e. they shall be connected prior to conventional power plants (art. 17e, Annex XI no. 4 RD 661/2007).
<b>Capacity limits</b>		

(quantitative criteria)	
Distribution of costs	
	State
	Consumers
	Grid operator
	Plant operator
	European Union
	Other
	Distribution mechanism
	The plant operator shall bear the costs of connection to and the possible expansion of the grid (Annex XI no. 8, 9 RD 661/2007). Furthermore, the operators of plants, or clusters of plants connected to the same access point, whose capacity exceeds 10 MW, must be connected to a control system and shall bear the costs of installation and maintenance of the control systems, including installation and maintenance of the communication lines to the grid operator (art. 18 d RD 661/2007).
	Plant operators may not pass on the costs of connection to the grid.

## Use of the grid

Abbreviated form of legal sources	<ul style="list-style-type: none"> <li>• RD 1955/2000</li> <li>• RD 661/2007</li> <li>• RD 1565/2010</li> <li>• RD 1669/2011</li> <li>• P.O. 3.7</li> <li>• RD 6/2009</li> <li>• RD 1578/2008</li> <li>• L 54/2007</li> </ul>
Contact Authority	<a href="http://www.cne.es/">http://www.cne.es/</a>
Overview	<p>The plant operators are statutorily entitled against the grid operator to priority export and dispatch of renewable electricity (art. 17 RD 661/2007). However, plant operators and grid operators are obligated to conclude an agreement that regulates the qualitative and quantitative conditions for the electricity to be exported to the grid. The agreement shall comply with the model contract provided by the Ministry of Energy and Mining (art. 20 par. 2, art. 16 RD 661/2007).</p> <p><b>Entitled party.</b> all electricity producers are entitled to the usage of the grid (Art. 26, par. 1, L 54/1997 and Artt. 56, 65 RD 1955/2000). As regards RES, the persons entitled are operators of plants that come under the so-called special regulation ("Régimen Especial"), (art. 17 RD 661/2007 in conjunction with art. 2 par. 1 b RD 661/2007). The following power plants have a special status:</p> <ul style="list-style-type: none"> <li>• <b>Technologies.</b> The plants' primary source of energy shall be a renewable source of energy like solar or wind energy as defined by statutory law (art. 2 par. 1 b RD 661/2007).</li> <li>• <b>Classification by the authorities.</b> Plants shall be classified as coming under the special regulation by official notice (art. 6, 14 par. 1 RD 661/2007).</li> <li>• <b>Connection to a central control system.</b> All plants, or clusters of plants connected to the same access point that generate electricity as specified by the special regime regulation and whose capacity exceeds 10 MW shall be connected to a central control system (CECRE), which shall be the interface to the plant operator. The control system, managed by the Transmission grid operator, shall provide real-time system information and make sure that the plant operator's instructions</li> </ul>

## RES-LEGAL EUROPE – National Profile Spain

	<p>are implemented in such a way as to guarantee the reliability of the electric system. All RES installations or clusters larger than 1 MW are required to provide to the transmission grid operator real-time telemetry information about their operating conditions (Art. 18, RD 661/2007).</p> <ul style="list-style-type: none"> <li>• <b>Other operation requirements</b> for RES installations may involve, depending on the technology used and the capacity installed, power factor ranges to be respected and low voltage ride through (LVTR) capability (Artt. 18, 29, Annex V RD 661/2007).</li> </ul> <p>Plants are required to be listed in the register of plants in order to be awarded the status of plant under the special regulation (art. 9 RD 661/2007). A different registry is the pre-assignment retribution registry (Registro de pre-asignación de retribución). This is the necessary condition for economic treatment under the special regulation. Inscription to this registryFor renewable energy systems to be eligible for the register of systems, they must be registered in the preliminary register ("Registro de Pre-asignación). Registration in the preliminary register is conditional upon certain criteria (art. 4 RD 6/2009, art. 4 RD 1578/2008). Real Decreto 1/2012 blocked a Access to pre-assignment retribution registry the above-mentioned registries is currently suspended, thus effectively blocking the economic treatment under the special regulation together with the incentive systems for RES-E “regimen especial” due to the block imposed by Real Decreto 1/2012. This however, has no effect in any other area of the special regulation (e.g. priority connection) apart from economic treatment, as confirmed by the National Energy Commission (CNE).</p>	
Procedure	<b>Process flow</b>	<ul style="list-style-type: none"> <li>• Grid connection</li> <li>• The claim for purchase and transmission arises when the plant is connected to the grid.</li> <li>• The grid operator is then obliged to accept and transmit the electricity.</li> </ul> <p>RES-E plants below 100 kV connected to networks with voltage below 1 kV (1000kV capacity and 36 kV line voltage for biomass plants) benefit of a simplified procedure with lower administrative requirements (RD 1669/2011)</p>
	<b>Deadlines</b>	<p>In general, the grid operator shall satisfy his obligation to take in RES electricity unconditionally and without undue delay. However, he may impose limitations if the capacity of the grid is fully used up or if there are other technical concerns (Annex XI RD 661/2007).</p>
	<b>Obligation to inform</b>	<p>The procedure to be followed by the transmission grid operator is described in PO 3.7. In</p>

## RES-LEGAL EUROPE – National Profile Spain

		summary, the transmission grid operator, via the CECRE and the generation control centres connected to it, may send instructions to the RES production facilities. RES facilities must comply with these instructions within 15 minutes.
<b>Priority to renewable energy</b> <b>(qualitative criteria)</b>	(X) Priority to renewable energy  ( ) Non-discrimination	Electricity from renewable sources shall be fed in and dispatched with priority, i.e. prior to electricity from conventional sources of energy. However, this priority ceases for plant operators not complying with the conditions laid down by the contract on the technical relations between a plant and grid operator (art. 17e, Annex XI no. 3, 4 RD 661/2007).
<b>Curtailement</b>	<p>The grid operator is obligated to take in all net electricity generated by a plant operator whenever the export of electricity to its infrastructure is technically possible (art. 17b, 20 RD 661/2007). Net electricity shall refer to the gross amounts of electricity generated by a plant less the plant's own consumption.</p> <p>The transmission grid operator may reduce electricity imports for the following reasons: grid stability or short-circuit power warnings, grid congestion, inadequate active or reactive power levels, production variations, balancing issues and minimum load. RES generators may be curtailed only after conventional generators have been curtailed wherever possible. In practice, wind farms are curtailed more often than other RES installations (Artt. 56, 65, 52 – 66bis RD 1955/2000, RD 661/2007, RD 1565/2010).</p>	
<b>Distribution of costs</b>		
	<b>State</b>	
	<b>Consumers</b>	
	<b>Grid operator</b>	
	<b>Plant operator</b>	The costs of feeding in and transmission of electricity are borne by the plant operator through a fee given to the grid operator (Art. 24, par. 2, and Art. 3 par. 1, L 54/1997).
	<b>European Union</b>	
	<b>Other</b>	

## RES-LEGAL EUROPE – National Profile Spain

	<b>Distribution mechanism</b>	There are no special mechanisms allowing for the costs to be passed on to the consumers

## RES-T support schemes

### Summary of support schemes

<b>Overview</b>	Promotion of biofuels in Spain consists of two measures: a quota system and a tax regulation mechanism. The tax regulation mechanism is in place until 2013.
<b>Summary of support schemes</b>	<p>Until 2013, the tax regulation mechanism provides a special tax rate (€ 0 per 1000 litres) for the production of biofuels, which can be modified through a specific legislative measure. Production or import of biofuels for pilot projects for the development of less contaminating products is exempt from tax payments.</p> <p>The quota system obliges whoever feeds fuels in the national system (retail and wholesale operators) as well as consumers relying on sources other than retail and wholesale operators, to feed in or consume a certain amount of biofuels every year. This amount is established in percentage and compliance is proven to the national energy commission (CNE) through certificates. At the end of each year, obligated parties must turn in the certificates corresponding to their biofuel sale / consumption. The CNE checks compliance and collects fees for non compliance from obligated parties. The penalty fees paid by the parties who did not reach their quota are redistributed among the parties who sold or consumed more biofuels than their set quota. These amounts are redistributed in proportion to the amount of biofuels that complying parties have sold or consumed in addition to their set quota.</p>
<b>Technologies</b>	<ul style="list-style-type: none"> <li>• Biofuels and biohydrogen</li> </ul>
<b>Statutory provisions</b>	<ul style="list-style-type: none"> <li>• RD 459/2011</li> <li>• Orden ITC/2877/2008</li> <li>• L 38/1992</li> <li>• RDL 4/2013</li> </ul>

### Support schemes

#### Tax regulation mechanism (Tipo Impositivo Especial – Special Tax rate )

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> <li>L 38/1992</li> </ul>	
Contact Authority	<a href="http://www.agenciatributaria.es">http://www.agenciatributaria.es</a>	
Summary	<p>Until the end of 2012, no taxes were in place for the production of biofuels. From 2013 this tax exemption has been lifted and a tax rate is now also in place for biofuels.</p>	
Eligible technologies	General information	Biofuels were eligible (Art. 50, L 38/1992)
	Biofuels	<p>The following biofuels were eligible:</p> <ul style="list-style-type: none"> <li>Bioethanol</li> <li>Biomethanol</li> <li>Biodiesel (Art. 50, par. 1, L 38/1992)</li> </ul>
	Electricity	
	Hydrogen	
Amount	<p>The tax rate for the production of eligible fuels was set at € 0 per 1000 litres (Art. 50.1 , L 38/1992).</p> <p>The use or import of biofuels for pilot projects for the development of less contaminating products is still exempt from tax payments (Art. 51, par. 3, L 38/1992).</p>	
Addressees	<p><b>Entitled Party:</b> Owners (personal or juridical personality) of production facilities or of oil networks where fuel transformation</p>	

## RES-LEGAL EUROPE – National Profile Spain

	<p>may take place (Art. 7, par. 1 L. 38/1992).</p> <p><b>Obligated Party:</b> the State.</p>	
Procedure	Process flow	This special tax rate applied directly to the produced goods at the moment in which they exit the production facility (Art. 7, par. 1 L. 38/1992).
	Competent authority	The Spanish Tax Agency (Agencia Tributaria)
Flexibility Mechanism		
Distribution of costs	State	The State carried the costs in terms of minor incomes from taxes.
	Consumers	
	Plant operator	
	Grid operator	
	European Union	
	Distribution mechanism	

**Biofuel quota (support mechanism for the use of biofuels and other renewable fuels for transport means)**

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> <li>• Orden ITC/2877/2008</li> <li>• RD 459/2011</li> <li>• RDL 4/2013</li> </ul>	
Contact Authority	<a href="http://www.cne.es">http://www.cne.es</a>	
Summary	<p>Wholesale and retail operators of fuels, as well as consumers of fuels not supplied by wholesale or retail operators, are obliged to sell / consume a minimal quota of biofuels. The minimal amount is set at a general level (all biofuels) and at a specific level (minimal amount of biofuels in diesel and in gasoline).</p> <p>Each obligated subject will have to present a number of certificates to the National Energy Commission (CNE) to prove compliance. Certificates have a value of 1 toe. In case of non-compliance with the goals, a penalty fee applies. In case of over-compliance (some parties selling or consuming more than they are obliged to), the amounts collected from the penalty fees are redistributed by the CNE proportionally to the subjects that sold / consumed biofuels exceeding their set quota obligation.</p>	
Eligible technologies	General information	Several types of biofuels and biohydrogen are promoted.
	Biofuels	<p>The following fall under the definition of “biofuels” in the context of this obligation (Art. 2, par. 1, Orden ITC/2877/2008):</p> <ul style="list-style-type: none"> <li>• Bioethanol,</li> <li>• Biodiesel</li> <li>• Biogas</li> <li>• DME</li> <li>• Biomethanol</li> <li>• bioETBE</li> <li>• bioMTBE</li> </ul>

## RES-LEGAL EUROPE – National Profile Spain

		<ul style="list-style-type: none"><li>pure vegetable oil</li><li>Other biomass-based fuels for transport.</li></ul>												
	Electricity													
	Hydrogen	Biohydrogen is promoted (Art. 2, par. 1, Orden ITC/2877/2008).												
Amount	Amount of quota and period of application	Addressees must deliver to the CNE an amount of certificates sufficient to satisfy the following minimal amounts of sale or consumption of biofuels (Art. 3 RD 459/2011 and Art. 41, RDL 4/2013).												
		<table><tr><td></td><td>2013</td><td>2014 onwards</td></tr><tr><td>Total minimal amount of sold / consumed biofuels</td><td>6.5%</td><td>4.1%</td></tr><tr><td>Total minimal amount of sold / consumed biofuels in <b>diesel</b></td><td>7.0%</td><td>4.1%</td></tr><tr><td>Total minimal amount of sold / consumed biofuels in <b>gasoline</b></td><td>4.1%</td><td>3.9%</td></tr></table>		2013	2014 onwards	Total minimal amount of sold / consumed biofuels	6.5%	4.1%	Total minimal amount of sold / consumed biofuels in <b>diesel</b>	7.0%	4.1%	Total minimal amount of sold / consumed biofuels in <b>gasoline</b>	4.1%	3.9%
			2013	2014 onwards										
		Total minimal amount of sold / consumed biofuels	6.5%	4.1%										
	Total minimal amount of sold / consumed biofuels in <b>diesel</b>	7.0%	4.1%											
Total minimal amount of sold / consumed biofuels in <b>gasoline</b>	4.1%	3.9%												
Adjustment of quotas	Quotas are set through publication of new laws / decrees.													
Fees and penalty charges	<p>Penalties and fees for non compliance are established through the formulas of Art. 11 Orden ITC/2877/2008. The Order sets a value of 350 € per certificate.</p> <p>Each certificate indicates that the obligated party has sold or consumed 1 toe of biofuels in one year (Art.2, par. 3, Orden ITC/2877/2008).</p>													

## RES-LEGAL EUROPE – National Profile Spain

<b>Addressees</b>	<p>The following subjects are required to satisfy the quota:</p> <ul style="list-style-type: none"> <li>• Wholesale operators for fuel for their sales in the national market, excluding their sales to other wholesale operators;</li> <li>• Retail operators for fuel in the national market, for their sales in the national market not covered by wholesale operators;</li> <li>• Consumers of fuels products, for their yearly consumption of fuels not supplied by wholesale or retail operators (Art. 2 RD 459/2011).</li> </ul>	
<b>Procedure</b>	<b>Process flow</b>	<p>Sale or consumption of biofuels of year n may be accredited by the CNE up to <b>1 April</b> of year n+1;</p> <p>By <b>1 June</b> of year n+1 the CNE will communicate to the addressees the amount of certificates they accredited, the number needed for complying with their obligation and the additional number needed to comply with their obligation, if any.</p> <p>By <b>1 July</b> of year n+1, all addressees that did not meet their quota will transfer the amount of their penalty to the CNE;</p> <p>By <b>1 August</b> of year n+1 the CNE will re-distribute the amounts received to subjects that have met a quota of biofuels beyond their goal. Re-distribution will take place in accordance with the formulas outlined on Art. 11, Orden ITC/2877/2008 (Art. 12, Orden ITC/2877/2008).</p>
	<b>Competent authority</b>	The National Energy Commission (CNE) (Art. 6, Orden ITC/2877/2008).
<b>Flexibility Mechanism</b>		

## RES-LEGAL EUROPE – National Profile Spain

Distribution of costs	State	
	Consumers	Consumers pay the additional costs of the biofuel obligation.
	European Union	
	Others	
	Distribution mechanism	<ul style="list-style-type: none"> <li>• The State imposes an obligation on Producers</li> <li>• Producers comply with the obligation and incur additional costs for compliance</li> <li>• Producers cover these additional costs through higher sale prices, thus transferring the costs to consumers, as confirmed by the CNE</li> </ul>

## Policies

### Summary of policies

<b>Overview</b>	Spain has a national training system for installers and an obligatory certification for solar thermal panels. In addition, there are two wider frameworks, the R&D plan and the building code, that include RES as an area of interest.
<b>Summary of policies</b>	<p><b>Training programmes for installers.</b> The national system of qualification and professional formation (NSQPF) provides a structured framework for the provision of vocational training also for energy.</p> <p><b>Certification Programmes for RES installations.</b> As regards certification, an obligation to be certified is in place for solar thermal panels to comply with international standards.</p> <p><b>RD&amp;D Policies.</b> National plan of scientific research, development and technological innovation 2008 – 2011 is the programming instrument that establishes goals and priorities of the national research policy in the mid-term. The plan covers very different areas and topics. One of its strategic actions is “Energy and Climate Change”. This plan has been extended from its original deadline in 2011 to until the new plan is published.</p> <p><b>Building obligations.</b> With respect to buildings and RES, it is stated in the technical building code that all new buildings or buildings undergoing major renovation in which there is demand for warm sanitary water / air conditioning of a covered swimming pool must satisfy some of this demand through solar thermal installations.</p>
<b>Technologies</b>	All policies apply to solar thermal. The NSQPF also applies to PV installations and wind power plants. The national plans of R&D do not specify technologies, but only types of projects. It is possible that technologies are specified in the single calls under the R&D plan.

## RES-LEGAL EUROPE – National Profile Spain

### RD&D Policies (National plan of scientific research, development and technological innovation 2013 - 2016)

Abbreviated form of legal source(s)	<ul style="list-style-type: none"> <li>Plan Nacional de Investigación Científica, Desarrollo e Innovación Tecnológica (2013-2016)</li> </ul>
Sector	<a href="http://www.idi.mineco.gob.es">http://www.idi.mineco.gob.es</a>
Contact Authority	RES-E, RES-H, RES-T
Description	<p>This plan is the programming instrument that establishes goals and priorities of the national research policy in the mid-term. The plan covers very different areas and topics. One of its strategic actions is “Reliable, safe and clean energy”. Within this strategic action, ten priority areas of intervention are considered:</p> <ol style="list-style-type: none"> <li>1. Solar Energy (thermal, PV, thermoelectric)</li> <li>2. Wind Energy</li> <li>3. Bio Energy</li> <li>4. Waste treatment with energy goals</li> <li>5. Hydrogen and fuel cells</li> <li>6. Sea and Tidal energy</li> <li>7. Geothermal</li> <li>8. Sustainable nuclear power</li> <li>9. Carbon Capture and Storage</li> </ol> <p>Smart grids</p>
Obligated entities	
Competent authority	The Ministry of Economics and Competitiveness

## RES-LEGAL EUROPE – National Profile Spain

### RES-H building obligations (Minimal solar contribution of warm sanitary water – Contribución solar mínima de agua caliente sanitaria)

<b>Abbreviated form of legal source(s)</b>	<ul style="list-style-type: none"> <li>CTE</li> </ul>
<b>Sector</b>	<a href="http://www.minetur.gob.es">http://www.minetur.gob.es</a>
<b>Contact Authority</b>	RES-H&C
<b>Description</b>	<p>All new buildings or buildings undergoing major renovation in which there is demand for warm sanitary water / air conditioning of a covered swimming pool must satisfy some of this demand through solar thermal installations (4.1.1.1.1, DB HE, CTE).</p> <p>The contribution varies between 30 and 70% of the total warm sanitary water demand of the building, depending on the demand level, the geographic position, the main heating source.</p> <p>Under presence of supply of warm sanitary water from other RES, under certain conditions that render the satisfaction of the obligation physically impossible, or as determined by the local competent authority for historic-artistic protection reasons, the obligation can be lowered or bypassed</p>
<b>Obligated entities</b>	To all new buildings or buildings undergoing major renovation in which there is demand for warm sanitary water / air conditioning of a covered swimming pool.
<b>Competent authority</b>	Ministry of Development.
<b>Further information</b>	<a href="http://www.codigotecnico.org/">www.codigotecnico.org/</a>
<b>Obligation on regional level</b>	Yes, as confirmed by the Ministry of Development
